Assessing higher-risk buildings under the Building Safety Act: a compendium of structural typologies
Assessing higher-risk buildings under the Building Safety Act: a compendium of structural typologies
# Contents

1. **Introduction**  
   1.1 Scope  
   1.2 Using the compendium  
   1.3 The assessment process  

2. **General building defects**  
   2.1 Common issues  
   2.2 Material-specific issues  
      2.2.1 Loadbearing masonry  
      2.2.2 Concrete-framed  
      2.2.3 Steel-framed  
      2.2.4 Wrought iron members  
      2.2.5 Cast iron members  
      2.2.6 Timber and timber-framed  
      2.2.7 Large panel systems  

3. **Compliance and historical code development**  
   3.1 General  
   3.2 Eurocodes  
   3.3 Concrete structures  
   3.4 Iron and steel structures  
   3.5 Timber structures  
   3.6 Masonry structures  
   3.7 Significant code developments  
      3.7.1 Disproportionate collapse  
      3.7.2 Design for wind loading  
      3.7.3 Design for punching shear  

4. **Structural typologies**  
   **Structural typology 1**  
   Victorian warehouse and mill conversions  
   **Structural typology 2**  
   Loadbearing masonry, lath and plaster/plasterboard ceilings  
   **Structural typology 3**  
   Loadbearing masonry with reinforced concrete slab  
   **Structural typology 4**  
   Loadbearing cavity wall masonry with reinforced concrete slab  
   **Structural typology 5**  
   Reinforced concrete frame with masonry infill
Structural typology 6
Large panel system

Structural typology 7
Reinforced Aerated Autoclaved Concrete (RAAC)

Structural typology 8
Hollow pot construction and steel frame extension

Structural typology 9
Steel frame and timber floor

Structural typology 10
Steel frame and precast concrete plank (incl. transfer deck over other use)

Structural typology 11
Steel frame and composite metal decking

Structural typology 12
Loadbearing lightweight metal frame

Structural typology 13
Reinforced concrete frame with reinforced concrete or post-tensioned floor slabs

Structural typology 14
Lightweight timber frame

Structural typology 15
Mass timber (cross-laminated timber and glulam)

Structural typology 16
Steel volumetric modular construction

5. Sourcing primary and secondary building information
5.1 Company archives
5.2 Specialist libraries
5.3 Digitised/online databases
5.4 Trade literature
5.5 Other sources of information
