

The Education Project Steering Committee

About the committee

The Education Project Steering Committee is chaired by the vice president and is made up of 15 practitioners and academics.

The Committee meets every two to three months and was put together in response to a project designed to transform undergraduate education for Structural Engineering.

Get involved

Membership of the Committee is by invitation but contributions are welcome from all academics working in this field.

Membership of the Education Project Steering Committee is a good way to play an active role in the education of future Structural Engineers.

Membership of the committee involves attending meetings and facilitating discussion in the area of education.

Project Steering Committee meetings

The Agenda for each meeting addresses the principal current issues for the project.

Recurrent themes are:

- desired learning outcomes for graduates understanding of structural behaviour
- preparation of 'Essential Knowledge on' texts for key aspects of structural behaviour
- Inputs to the Annual Academics' Conference
- workshops to 'train the trainers' and address specific topics for the project
- wider relationships

Responsibilities

To oversee and guide all aspects of the education project.

Contact details.

If you have an enquiry or wish to register your interest in serving on the panel, please contact the [panel secretary](#).
