The Structural Engineer

JOURNAL OF THE INSTITUTION OF STRUCTURAL ENGINEERS

INDEX Volume 74, 1996.

AUTHOR
INDEX

Akroyd, T N W Earth-retaining structures: introduction to the code of practice 360	Bolton, M D Geotechnical design of retaining walls 365
Al-Kabbani, I Design and performance of the 11 350m ³ rectangular Jubilee Reservoir, Sri Lanka - Synopsis 40	Bredenkamp, P J The lateral-torsional buckling strength of hot-rolled stainless steel beams 316
Al-Shawi, FAN Design charts for corbels 222	Bridges, H W The new Commerzbank headquarters, Frankfurt, Germany 111
Allen, J D Professor Sir Edmund Happold, RDI, FEng - entrepreneur, visionary, teacher 47	Brohn, D M Engineering on the right 380
Forms of contract - the debate continues - Commentary 124	Brown, D G A new industry standard for moment connections in steelwork 335
Alvas, D Design of special vibration insulators for a building constructed in a cavern 29	Buller, P S J Some highlights of 75 years' structural engineering research at BRE .. 194
Anchor, R D The design of liquid-retaining structures: a review of various national recommendations 101	Burgess, IW Computer simulation of a full-scale structural fire test 93
Anderson, I Freestanding, lightweight mezzanine floors 138	Burgoyne, C J The assessment of reinforced concrete slabs 147
Anumba, C J Towards an concurrent engineering model for design- and-build projects 73	Butcher, A P Foundations for low-rise buildings 179
..... - Discussion 388	Butler, KM Traffic load 'fingerprinting' of bridges for assessment purposes - Correspondence 127
Armer, GST Some highlights of 75 years' structural engineering research at BRE 194	C
Atlasovitz, J Design of special vibration insulators for a building constructed in a cavern 29	Cairns, J A strategy for teaching structural engineering design 375
Austin, Mathew Archaeological investigations at Woolbeding Bridge, W. Sussex . . . 90	Chan, S L A simplified design method for non-sway composite frames with semi-rigid connections - Discussion 275
Ayre, P G The Hong Kong Stadium - Discussion 135	Chiew, S P SCF design equations for steel multiplanar tubular XT-joints 215
B	Chrisp, T M A strategy for teaching structural engineering design 375
Bailey, C G Computer simulation of a full-scale structural fire test 93	Clancy, B P New buildings from old: some views on refurbishment projects - Discussion 20
Barnard, H The lateral-torsional buckling strength of hot-rolled stainless steel beams 316	We, the members, are the Institution. Presidential Address 353
Barrie, M A Glaxo Wellcome Medicines Research Centre, Stevenage: anatomy of the design process 129	Clarke, J L The reinforcement of concrete structures with advanced composites 283
..... - Discussion 370	Cole, R N The Hong Kong Stadium - Discussion 135
Beal, A N Skyhooks at 18 foot centres: strengthening a precast OPC/HAC concrete frame at Hattersley Heaton, Nottinghamshire 6	Corp, H L British Airways Heavy Maintenance Hangar, Cardiff Wales Airport: structural system 229
Beevers, P Lille TGV Station 17	Crilly, M S Foundations for low-rise buildings 179
..... - Discussion 261	Crouch, R S The Centre for Cement & Concrete, University of Sheffield - Academia 15
Berg, G J van den The lateral-torsional buckling strength of hot-rolled stainless steel beams 316	Crowley, A A guide to painless computer-integration 50

D		Houghton, S	
Denton, S R		Introducing the Steel Construction Institute	Research matters 374
The assessment of reinforced concrete slabs	147	Hughes, A F	
Dexter, EM.....		A new industry standard for moment connections in steelwork . . .	335
Strength of moment-loaded tubular T/Y-joints in offshore platforms		J	
..... - Corrigenda	28	Jacobs, N Temporary demountable structures: the need for guidance -	
Dias, WPS		Excursus 84	
Design and performance of the 11 350m ³ rectangular Jubilee		Jefcoat, A Glaxo Wellcome Medicines Research Centre,	
Reservoir, Sri Lanka. Synopsis	40	Stevenage:	
Dixon, R		anatomy of the design process.....	129
Strengthening of the charging ramp to the Darby furnace,	 - Discussion	370
Coalbrookdale.....	61	Ji, T	
Dongjie Huang		Dynamic testing and numerical modelling of the Cardington	
Composite beams: reliability and longitudinal shear resistances with		Steel Framed Building from construction to completion.....	186
profiled sheeting	Research matters 426	Johnson, D	
Doran, S M		Performance of strip footings on fill materials reinforced by	
Partners in technology	Research matters 264	stone columns	265
The role of professional institutions in stimulating, supporting and		Johnson, R P	
disseminating research	Research matters 128	Integrated static and fatigue design or assessment of stud shear	
Driscoll, RMC		connections in composite bridges	236
Foundations for low-rise buildings	179	Jones, D M	
E		Three tiers for the double champions: Old Trafford - a stadium	
Eastwood, RCA		for the 21st century.....	297
SARTOR - the future formation of engineers	403	K	
Ellis, B R		Kirby, P A	
Dynamic testing and numerical modelling of the Cardington		The design of laterally restrained beams in non-sway frames	
Steel Framed Building from construction to completion	186 - Synopsis	122
Evbuomwan, N F O Towards a concurrent engineering model		Kirkpatrick, J	
for design and build		Traffic load 'fingerprinting' of bridges for assessment purposes.	
projects	73 - Correspondence	127
..... - Discussion	388	Kirwood, M G	
Fewster, SMC		Strength of moment-loaded tubular T/Y-joints in offshore	
A new industry standard for moment connections in steelwork .. .	335	platforms.....	Research matters 28
Ford, R F	 - Corrigenda	
Alusaf Hillside Aluminium Smelter, Richards Bay	311	Krige, G J	
Forster, R		The design of shaft steelwork towers at reef intersection in deep mines	320
The Hong Kong Stadium	Discussion 135	L	
Fung, T C		Lau, S M	
SCF design equations for steel multiplanar tubular XT-joints.....	215	The design of laterally restrained beams in non-sway frames	
G	 - Synopsis	122
Goldstein, A E		The response of non-sway steel framed structures with	
The Joint Structural Division in South Africa	333	semi-rigid connections	
Gray, T A		426	
From BIC to CIB - a voice for unity?.....	343	Le Bourva, S	
Gregson, S J		Lille TGV Station	17
The Royal Armouries Museum, Leeds: engineering design	1 - Discussion	261
H		Lee, M M K	
Halabi, W		Strength of moment-loaded tubular T/Y-joints in offshore platforms	
Steel-fibre-reinforced high strength concrete corbels:	 - Corrigenda	28
test results and analysis	412	Lee, W M	
Hamdan, F		SCF design equations for steel multiplanar tubular XT-joints	215
European seismic design practice	Research matters 128	Li, TQ	
Harris, G E		Analysis and ductility requirements of semi-rigid composite	
Three tiers for the double champions: Old Trafford - a stadium		frames	Research matters 426
for the 21st century.....	297	Lilley, C	
Harris, P J		Alusaf Hillside Aluminium Smelter, Richards Bay	211
Engineers and the law of design	Legal column 163	Longley, A J	
The flight of the cranes	Legal column 241	The ongoing role of the Construction Technology Foresight Panel	
Haslem, R E	 - Research matters	.87
Structural interaction at joints in pipe-jacked tunnels	165	Luke, S J	
Hicks, S J		British Airways Heavy Maintenance Hangar,	
The testing of three full-scale stub-girder floor beams	289	Cardiff Wales Airport: structural system.....	229
Hobbs, B		Lynch, P C	
Structural behaviour of externally bonded, steel plated rc beams		Preparing for and taking the Part 3 examination.	
after long-term exposure	Correspondence 308 - Viewpoint	386
Hobbs, R E		M	
Local web buckling in tapered composite beams	41	Morley, C T	
..... - Correspondence	127	Finite element analysis of geometric non-linearity in plane	
		frameworks	Correspondence 72
		MacLeod, IA	
		The equivalent column concept in stability analysis of buildings . . .	405
		The global critical load ratio approach to stability of building structures	249

Mangat, P S		Somerville, G	
Steel-fibre-reinforced high strength concrete corbels: test results and analysis	412	The Concrete Industry Alliance Research & Development Task Group	- Research matters 296
McConnel, R E		Steer, P J	
The testing of three full-scale stub-girder floor beams	289	Codes of practice update - timber	- Research matters 158
Merwe, P van der		Surtees, J O	
The lateral-torsional buckling strength of hot-rolled stainless steel beams	316	Load-strength charts for pitched roof, haunched steel portal frames with partial base restraint	9
Miller, J	90	9
Archaeological investigations at Woolbeding Bridge, W. Sussex ...	90	Swamy, R N	
Milner, M		Structural behaviour of externally bonded, steel plated rc beams after long-term exposure.....	- Correspondence 308
Bracing philosophy in trussed rafter roofs	153		
Making the grade: dry timber	- Guidance note 106		
N		T	
Nethercot, D A		Taylor, H P J	
A simplified design method for non-sway composite frames with semi-rigid connections	- Discussion 23	The new Scottish Widows HQ, Edinburgh	423
Nokhasteh, M-A		Timber 2005	- Research matters 228
Corrosion damaged reinforced concrete beams with debonded tensile span reinforcement.....	198	Tietz, S B	
		Ruminations of an awards assessor	- Viewpoint 160
		Tubman, J	
		Steel bridges across 'The Pond': a glimpse of North American practice	395
O			
O'Brien, E J		Velasco, P C G da S	
Traffic load 'fingerprinting' of bridges for assessment purposes.	- Correspondence 127	Local web buckling in tapered composite beams . - Correspondence	41 127
Oehlers, D J			
Integrated static and fatigue design or assessment of stud shear connections in composite bridges	236	W	
Owens, G W		Waby, D R	
A new industry standard for moment connections in steelwork	335	Centro project, Oberhausen, Germany	35
		- Discussion 346
P		Waldron, P	
Peaston, C H		The reinforcement of concrete structures with advanced composites	283
Production, properties and design of sprayed fibre concrete	- Research update 198	Walsh, S R	
Plank, R J		The new Commerzbank headquarters Frankfurt, Germany,	111
Computer simulation of a full-scale structural fire test	93	Watermeyer, R B	
		Recent developments in providing houses of masonry construction in South Africa	325
R		Watson, A	
Rigbi, Z		A guide to painless computer-integration	50
Design of special vibration insulators for a building constructed in a cavern	29	Watts, K S	
Roberts, M		Performance of strip footings on fill materials reinforced by stone columns	265
Structural behaviour of externally bonded, steel plated rc beams after long-term exposure.....	- Corespondence 308	Wen, H X	
Rushton, J A		Prediction of structural effects in concrete affected by alkali-aggregate reaction.....	- Research abstract 159
Southampton International Airport Terminal	53	Wernick, J M	
.....	- Discussion 306	Lille TGV Station	17
Ryall, M J		- Discussion 261
Measurement of stresses in concrete structures using an instrumented hard-inclusion technique	255	Westbrook, R K	
		Part3, model answers and all that	- Viewpoint 11
S		Willoughby, S B	
Saadi, A		The Ridgeway Footbridge	79
Performance of strip footings on fill materials reinforced by stone columns	265	Wilson, R A	
Salami, A T		Admission to corporate membership of the Institution as a 'mature candidate'	- Viewpoint 172
Finite element analysis of geometric non-linearity in plane frameworks	- Correspondence 72	Wise, C M	
Sloan, T D		The new Commerzbank headquarters, Frankfurt, Germany	111
Traffic load 'fingerprinting' of bridges for assessment purposes	- Correspondence 127	Wong, Y L	
Smith, B W		A simplified design method for non-sway composite frames with semi-rigid connections	23
BRE's present and future role.....	- Viewpoint 197	- Discussion 275
Smith, L M		Wood, L A	
In-service monitoring of nuclear safety related structures.....	210	Performance of strip footings on fill materials reinforced by stone columns	265
Soane, A J M			
Centro project, Oberhausen, Germany.....	35	Y	
.....	- Discussion 346	Yeap, S H	
Soh, A K		Load-strength charts for pitched roof, haunched steel portal frames with partial base restraint	9
SCF design equations for steel multiplanar tubular XT-joints	215	9
Soh, C K		Z	
SCF design equations for steel multiplanar tubular XT-joints	215	Zalka, K A	
		The equivalent column concept in stability analysis of buildings ..	405
		The global critical load ratio approach to stability of building structures	249

Accidental damage Southampton International Airport Terminal		The reinforcement of concrete structures with advanced composites	283
		A simplified design method for non-sway composite frames with semi-rigid connections..... - Discussion	275
		Skyhooks at 18 foot centres: strengthening a precast OPC/HAC concrete frame at Hattersley Heaton, Nottinghamshire ..	
Airports		6	
British Airways Heavy Maintenance Hangar, Cardiff Wales Airport: structural system		Southampton International Airport Terminal.....	53
Southampton International Airport Terminal.	 - Discussion	306
..... - Discussion	306	Strength and behaviour of fibre-reinforced concrete beams under combined bending, shear and torsion	- Research abstracts 159
Aluminium		Structural behaviour of externally bonded, steel plated rc beams after long-term exposure.....	- Correspondence 308
Alusaf Hillside Aluminium Smelter, Richards Bay	311	The testing of three full-scale stub-girder floor beams	289
Appraisal		Bearings	
The assessment of reinforced concrete slabs	147	The Ridgeway Footbridge	79
Corrosion damaged reinforced concrete beams with debonded tensile span reinforcement.....	198	Biographies	
The global critical load ratio approach to stability of building structures	249	The President 1996-97 [Brian Clancy]. Profile	303
Integrated static and fatigue design or assessment of stud shear connections in composite bridges	236	Professor Sir Edmund Happold, RDI, FEng - entrepreneur, visionary, teacher.....	47
New buildings from old: some views on refurbishment projects.		R B Watermeyer	- Profile 324
..... - Discussion	207	Bolts A new industry standard for moment connections in steelwork ...	
Steel bridges across 'The Pond': a glimpse of North American practice.....	395	335	
A strategy for teaching structural engineering design	375	Bond Corrosion damaged reinforced concrete beams with debonded	
Traffic load 'fingerprinting' of bridges for assessment purposes.		tensile span reinforcement	198
..... - Correspondence	127	The reinforcement of concrete structures with advanced composites	283
Arch bridges		Bored piles	
Archaeological investigations at Woolbeding Bridge, W. Sussex ...	90	Centro project, Oberhausen, Germany	35
The Ridgeway Footbridge	79 - Discussion	346
Archaeology		Structural behaviour of externally bonded, steel plated rc beams after long-term exposure.....	- Correspondence 308
Archaeological investigations at Woolbeding Bridge, W. Sussex	90	Boreholes	
Strengthening of the charging ramp to the Darby furnace, Coalbrookdale	61	Three tiers for the double champions: Old Trafford - a stadium for the 21st Century	297
Arches		Bracing	
The Hong Kong Stadium	- Discussion 135	Bracing philosophy in trussed rafter roofs.....	153
ASR		The equivalent column concept in stability analysis of buildings ...	405
Prediction of structural effects in concrete affected by alkali-aggregate reaction	- Research abstract 159	A simplified design method for non-sway composite frames with semi-rigid connections	23
Atria	 - Discussion	275
The new Commerzbank headquarters, Frankfurt, Germany	111	BRE	
Australia		BRE's present and future role	- Viewpoint 197
The design of liquid-retaining structures: a review of various national recommendations	101	Some highlights of 75 years' structural engineering research at BRE	194
Awards		Bridges (see also arch bridges, footbridges etc.) Integrated static and fatigue design or assessment of stud shear connections in composite bridges	236
Ruminations of an awards assessor.....-Viewpoint	160	The reinforcement of concrete structures with advanced composites	283
B		Steel bridges across 'The Pond': a glimpse of North American practice .	395
