Structural Engineer

JOURNAL OF THE INSTITUTION OF STRUCTURAL ENGINEERS

INDEX Volume 75, 1997

AUTHOR INDEX

A		Byfield, M P	
Abbot, A		Material and geometric properties of structural steel for use in design.	363
Changes to structural timber codes.	Technical note		28
Abdulrazzaq Jasim, N		C	
Deflections of composite beams with partial shear connection.		Cafolla, J	
Adwan, O		Fabrication of steel bridge girders with corrugated webs.	133
High strength concrete: an investigation of the flexural behaviour of high strength rc beams.		Cairns, J	
Ahmed, B		A strategy for teaching structural engineering Design.	391
Design of flush endplate connections in composite beams.		Campos, E S	
233		Theory of plasticity applied to the slant shear test.	124
Akinradewo, T O	 - Research matters	
Structural assessment of the Jodrell Bank Telescope.		Chan, J K W	
. - Research matters		Problem building structures and public safety: the case of Hong Kong.	198
51		Cheung, P C	
Aldridge, T R		Behaviour of beam-column joints in seismically-loaded RC frames.	104
Current and future developments in offshore platform foundations. - Discussion	
78		Chrisp, T M	
Allen, John D		A strategy for teaching structural engineering Design.	391
The Dearing Report and SARTOR: the Institution still		Chuang, P H	
Awaits a more positive vision.		Large scale tests on slender, reinforced concrete columns.	410
322		Clark, L A	
The Private Finance Initiative - the new approach to construction procurement.	Excursus	How can we get the cover we need?.	289
47		Serviceability limit state aspects of continuous bridges using pre-cast concrete beams.	185
Anderson, D		Cox, B A	
Design of braced steel frames with ductile partial-strength connections.	Guidance note.	The Building Regulations: approved persons of self-certification - to be or not to be?.	377
49		Crilly, M S	
Anumba, C J		Foundations for low rise buildings. - Correspondence	101
Structural engineering in cyberspace: enabling information and communication technologies.		Croll, J G A	
259		Thoughts on the structural efficiency of cable-stayed and catenary suspension bridges.	173
	 - Discussion	345
B		Cross, P T	
Bailey, P A		The new Commerzbank headquarters, Frankfurt, Germany.	355
The new Commerzbank headquarters, Frankfurt, Germany. - Discussion	355
355		Cusens, A R	
Bainbridge, R J		Whole-life costing. - Feature	122
New opportunities for timber engineering.		D	
278		da Silva, Jo	
Serviceability performance of timber floors.		Women in construction: a personal view.	374
275		Desai, S B	
Bakht, B		Combination of links and central bars as alternative shear reinforcement.	152
Evaluation by proof testing of a T-beam bridge without drawings	 - Correspondence	425
339		Dickie, JF	
Beale, R G		Stadium structures: are they excited?.	383
Sway stiffness of scaffold structures.		Driscoll, R M	
4		Foundations for low rise buildings. - Correspondence	101
Sway stiffness of scaffold structures. - Corrigenda		Driscoll, R M C	
244		The new BRE. - Research Matters	397
Beeby, A W			
Ductility in reinforced concrete: why it is needed and how is it achieved?.			
311			
Bridges, H W			
The new Commerzbank headquarters, Frankfurt, Germany.			
. - Discussion			
355			
Brohn, D M			
Engineering on the right. - Correspondence			
159			
Bullman, P J M			
Shear strength within reinforced concrete beam-column joints.			
53			
Bunce, J W			
Offshore structures technology: research and development.			
86			
Butcher, A P			
Foundations for low rise buildings. - Correspondence			
101			

Duke, A			
Structural engineering in cyberspace: enabling information and communication technologies.	259		
E			
Eastwood, R C A			
Fragmentation of design responsibilities.	136		
Ellis, B R			
Effective bracing systems for temporary grandstands.	95		
.			389
.			Correspondence.
Fahole-Luke, P S			
Using advanced composite materials in bridge strengthening: introducing Project ROBUST.	16		
Foster, Sir Norman			
Cities and urban life: London and elsewhere. Maitland Lecture	125		
G			
Gilbert, M			
The collapse behaviour of multispan brickwork arch bridges.	297		
Gilbertson, Alan			
What every structural engineer needs to know about construction adjudication - including you!	430		
.			Briefing
Godley, H R			
Sway stiffness of scaffold structures	4		
.			Corrigenda
.			244
Gudmestad, O T			
Offshore structures technology: research and development.	86		
H			
Harris, A			
Freyssinet: the genius of prestressing - Sutherland History Lecture	201		
Harris, G E			
Three tiers for the double champions: Old Trafford - a stadium for the 21st century.	138		
.			Discussion.
Harris, P A			
The safe erection of precast concrete flooring.	423		
.			Feature
Hill, R N			
Are old High Alumina Cement Concrete (HACC) roof structures still a problem?.	421		
.			Viewpoint
Hongyu Li			
Analysis of steel silo structures on discrete supports.	51		
Hughes, A F			
Design of braced steel frames with ductile partial-strength connections.	49		
.			Guidance note
Hume, I J			
The Structural engineer in conservation.	33		
.			Discussion
.			306
I			
Ibell, T J			
A plasticity approach to the assessment of shear in concrete beam-and-slab bridges.	331		
Innes, J			
Integrated, multilevel condition monitoring of structures.	91		
Jackson, N			
Design of reinforced concrete corners with diagonals.	419		
Jaeger, L G			
Evaluation by proof testing of a T-beam bridge without drawings	339		
Jeffers, E			
Design of braced steel I-beam assemblies without rigid decking	253		
Jenkins, W M			
An introduction to neural computing for the structural engineer.	38		
.			Correspondence
.			248
Ji, T			
Effective bracing systems for temporary grandstands.	95		
.			Correspondence.
.			389
Johnson, R P			
Fabrication of steel bridge girders with corrugated webs.	133		
Jones, A E K			
Whole-life costing	122		
.			Feature
Jones, D M			
Three tiers for the double champions: Old Trafford - a stadium for the 21st century.	138		
.			Discussion.
K			
Kong, F K			
High strength concrete deep beams subjected to combined top-and bottom-loading.	191		
Large scale tests on slender, reinforced concrete columns.	410		
L			
Lane, J S			
Using advanced composite materials in bridge strengthening: introducing Project ROBUST.	16		
.			Research matters
Lau, I Y S			
Future standards for Hong Kong.	103		
Laver, W G.			
Development of North Sea fixed platforms.	67		
Leeming, M B			
Using advanced composite materials in bridge strengthening: introducing Project ROBUST.	16		
.			Research matters
Locke, J			
Corrosion prevention of constructional steelwork- Guidance note	157		
M			
Marsh, B K			
How can we get the cover we need?.	289		
McGowan, Alan			
Integrated, multilevel condition monitoring of structures.	91		
McQuillan, D			
Raising the roof on the Belfast Waterfront Hall.	109		
Melbourne, C			
The collapse behaviour of multispan brickwork arch bridges.	297		
Mettem, C J			
Researching efficiency in structural timber.	275		
Serviceability performance of timberfloors.	275		
Michie, C			
Integrated, multilevel condition monitoring of structures.	91		
Middleton, C R			
A plasticity approach to the assessment of shear in concrete beam-and-slab bridges.	331		
Middleton, C R			
Concrete bridge assessment - an alternative approach.	403		
Milner, M W			
New opportunities for timber engineering.	278		
Mohamad Ali, A A			
Deflections of composite beams with partial shear connection.	58		
Moore, D B			
A design method for concrete filled hollow section, composite columns.	368		
Morley, C T			
A plasticity approach to the assessment of shear in concrete beam-and-slab bridges.	331		
Morris, D A			
Problem building structures and public safety: the case of Hong Kong	198		
Motro, R			
The design of slender, monotubular steel arches.	143		
Munday, J G L			
High strength concrete: an investigation of the flexural behaviour of high strength rc beams.	115		
Muranian, P			
Vulnerability of existing steel framed buildings: following the 1994 Northridge (California, USA) earthquake: considerations for their repair and strengthening.	165		

N	
Nasharuddin Mustapha, K	
Parametric study of the behaviour of reinforced concrete columns in fire.	124
Nethercot, D A	
Design of flush endplate connections in composite beams.	233
Nethercot, D A	
Material and geometric properties of structural steel for use in design.	363
Nethercot, D A	
The IStructE Research Panel - Research matters!	163
O	
Owens, G W	
The use of fully threaded bolts for connections in structural steel-work for buildings. - Discussion	42
P	
Pallett, P F	
How can we get the cover we need?.	289
Park, R	
Behaviour of beam-column joints in seismically-loaded RC frames. - Discussion	104
Parker, D E	
Shear strength within reinforced concrete beam-column joints.	53
Paulay, T	
Behaviour of beam-column joints in seismically-loaded RC frames. - Discussion	104
Pearce, P T	
Marketing professionally.	1
Porritt, Jonathon	
Engineering the environment - Feature	357
R	
Ragupathy, P	
Non-linear behaviour of precast concrete frames. - Research matters	124
Rawstron, A	
Collateral warranties - an introduction to why they are required and what they should contain. - Legal column	431
Contract law: some basic principles explained. - Legal column	226
Reid, W M	
Stadium structures: are they excited?.	383
Robertson, A P	
The design of slender, monotubular steel arches.	143
Roulston, R N	
Raising the roof on the Belfast Waterfront Hall.	109
Roux, Ph	
The design of slender, monotubular steel arches.	143
S	
Sarkar, S	
High strength concrete: an investigation of the flexural behaviour of high strength rc beams.	115
Seymour, D E	
How can we get the cover we need?.	289
Shammas, M G K	
How can we get the cover we need?.	289
Simpson,, J L	
The redevelopment of Twickenham for the Rugby Football Union. - Discussion	62
Smart, R A	
Computers in the design office: boon or bane? . . . - Viewpoint	52
Smith, C J	
The new Commerzbank headquarters, Frankfurt, Germany. - Discussion	355
Snell, R O	
Offshore structures technology: research and development	86
Soane, A J M	
Application of IT to technology transfer.	264
Song, T Q	
Two new types of seismic-isolation device.	13
Stokes, M J	
Planning supervisors and the work of the IStructE CDM Task Group.	266
Subedi, N K	
Research and development in structural engineering - who needs it?. - Feature	207
Sugie, I	
Serviceability limit state aspects of continuous bridges using pre-cast concrete beams.	185
T	
Tan, K H	
A strut-and-tie model for deep beams subjected to combined top and bottom loading.	215
High strength concrete deep beams subjected to combined top-and bottom-loading.	191
Taylor, H P J	
Developments in concrete bridges. - Research matters	348
Teng, S	
A strut-and-tie model for deep beams subjected to combined top and bottom loading.	215
Thorburn, S	
The challenge of structural engineering: safety with economy and harmony. - Presidential Address	349
Thornton, J A	
A new Glyndebourne Opera House.	17
Tietz, S B	
Design education - Viewpoint	325
Researching efficiency in structural timber.	275
Turzynski, J G	
A new Glyndebourne Opera House.	17
W	
Wagstaff, M	
The collapse behaviour of multispan brickwork arch bridges.	297
Walsh, S R	
The new Commerzbank headquarters, Frankfurt, Germany. - Discussion	355
Wang, W J	
Two new types of seismic-isolation device.	13
Wang, Y C	
A design method for concrete filled hollow section, composite columns.	368
Watkinson, D R	
Six easy steps to reduce your accountancy fees.	229
Watson, G R	
Flow patterns in flat bottomed silos. -Research matters	51
Webster, D A	
The redevelopment of Twickenham for the Rugby Football Union. -Discussion	62
Weng, L W	
High strength concrete deep beams subjected to combined top-and bottom-loading.	191
A strut-and-tie model for deep beams subjected to combined top and bottom loading.	215
Wild, S	
Innovation and environmentally cost.	210
effective building materials'. - Academia	
Wise, C M	
The new Commerzbank headquarters. - Discussion	355
Wright, H D	
Integrated, multilevel condition monitoring of structures.	91
Wright, J	
Stadium structures: are they excited?.	383

The new Commerzbank headquarters, Frankfurt, Germany.	355	Integrated, multilevel condition monitoring of structures.	91
..... Discussion		Insurance	
Three tiers for the double champions: Old Trafford - a stadium for the 21st century.	138	Planning supervisors and the work of the IStructE CDM Task Group.	266
Vulnerability of existing steel framed buildings: following the 1994 Northridge (California, USA) earthquake: considerations for their repair and strengthening.	165	Integral bridges	
Freyssinet, Eugene		Developments in concrete bridges.	348
Freyssinet: the genius of prestressing.	201	Internet	
G		Application of IT to technology transfer.	264
Germany		Structural engineering in cyberspace: enabling information and communication technologies.	259
The new Commerzbank headquarters, Frankfurt, Germany.	355	IStructE	
..... Discussion		The IStructE Research Panel.	163
Glass		*Part 3 and Associate membership examinations, April 1997.	
The new Commerzbank headquarters, Frankfurt, Germany.	355	Examiners report. Part 1.	427
Glyndebourne opera house, Sussex		Notices and Proceedings: Annual General Meeting.	283
A new Glyndebourne Opera House.	17	Notices and proceedings (elections, transfers etc.).	26, 89, 161
Greenhouses		The Predient 1997-98, Sam Thorburn.	319
The design of slender, monotubular steel arches.	143	Brian Clancy's Year - recovery at home and recognition overseas.	
H	 Interview	320
Hardwood		Jodrell Bank	
Researching efficiency in structural timber.	275	Structural assessment of the Jodrell Bank Telescope.	51
High alumina cement	 Research matters	
Are old high alumina cement concrete (HACC) roof structures still a problem?.	421	Joints	
..... Viewpoint		An introduction to neural computing for the structural engineer.	248
Historic buildings	 Correspondence	
The structural engineer in conservation.	33	Changes to structural timber codes.	28
History		Design of flush endplate connections in composite beams.	233
Current and future developments in offshore platform foundations	78	Design of reinforced concrete corners with diagonals.	417
Development of North Sea fixed platforms.	67	Shear strength within reinforced concrete beam-column joints.	53
Ductility in reinforced concrete: why it is needed and how it is achieved?.	311	Sway stiffness of scaffold structures.	244
Freyssinet: the genius of prestressing.	201	The fatigue, fracture and ultimate behaviour of fillet-welded RHS K-joints with gap.	200
Research and development in structural engineering - who needs it?.	207 Research matters	
..... Feature		Vulnerability of existing steel framed buildings: following the 1994 Northridge (California, USA) earthquake: considerations for their repair and strengthening.	165
The collapse behaviour of multispan brickwork arch bridges.	297	L	
The structural engineer in conservation.	33	Landfill	
Hollow sections		Foundations for low rise buildings.	101
A design method for concrete filled hollow section, composite columns.	368	Law	
Hong kong		Collateral warranties - an introduction to why they are required and what they should contain.	431
Future standards for Hong Kong.	103	Contract law: some basic principles explained.	226
Problem building structures and public safety: the case of Hong Kong.		Planning supervisors and the work of the IStructE CDM Task Group.	266

Problem building structures and public safety: the case of Hong Kong	198	Opera houses	
The Building Regulations: approved persons of self-certification - to be or not to be?	377	A new Glyndebourne Opera House	.17
London		Organisations	
Cities and urban life: London and elsewhere.		The new BRE	Research Matters 397
