

The Structural Engineer

INDEX Volume 77, 1999

AUTHOR INDEX

	Issue	Page		Issue	Page
A					
Abu-Tair, A I			Burdekin, F M		
The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge . . .	23	38	Size matters for structural engineers – Gold Medal Address	21	23
Al-Qarra, H			Bussell, M N		
Assessment of creep and shrinkage of concrete for the Flintshire Bridge	5	21	Investigation, appraisal, and reuse, of a cast-iron structural frame – Discussion	8	31
Anderson, D			C		
A fresh look at the wind-moment method.	16	22	Cairns, R		
Anumba, C J			Information technology for the structural engineer	3	23
A knowledge-based system for the engineering management of subsidence cases	3	26	Camilleri, D H		
Austin, J A			Vulnerability of buildings in Malta to earthquake, volcano and tsunami hazard	22	25
Over-design: fact or fiction? – Discussion	1	21	Chapman, J C		
B					
Badoo, N			Design of flat-bar-stiffened plating against local buckling	22	18
Stainless steel in fire – Research report	19	16	Local critical buckling of flat-bar-stiffened plating	19	23
Bailey, C G			Chaudhary, Z		
The behaviour of full-scale steel-framed buildings subjected to compartment fires.	8	15	Cathodic protection of early steel-framed buildings – Technical note	10	11
Bainbridge, R J			Chou, S K G		
Bonded-in rods for timber structures: a versatile method for achieving structural connections.	15	24	Design of flat-bar-stiffened plating against local buckling.	22	18
Baker, A			Local critical buckling of flat-bar-stiffened plating	19	23
A swim fit for the military: Aldershot training facility . . .	16	12	Chuang, P H		
Bateman, D			Large-scale tests on slender reinforced concrete columns – Correspondence	23/24	42
Protecting our piers.	13	16	Clark, L A		
Beeby, A W			Playing to our strengths – President's corner	11	7
Safety of structures, and a new approach to robustness – Discussion	4	16	Seizing the opportunities.	11	9
Bishop, J			Cook, N		
The Woolf reforms and civil procedures rules. – Guidance note	21	24	Some comments on internal pressures and dominant openings – Excursus	23/24	17
Blockley, D I			Cowperthwaite, S		
A theory of structural vulnerability.	18	17	Integrating culture and technology	1	16
Bode, H		 – Discussion	17	29
'Slimflor' and 'Slimdek' construction: European developments.	8	22	Cromie, J A		
Brekelmans, J W P M			The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge . . .	23/24	38
'Slimflor' and 'Slimdek' construction: European developments.	8	22	Currie, D M		
Brooks, J J			Changes to standards on imposed loads for buildings	4	22
Assessment of creep and shrinkage of concrete for the Flintshire Bridge	5	21	D		
Brown, K J			Davidson, P C		
Prospects for the Prospect Room: the proposed strengthening of an Elizabethan timber floor at the Wollaton Hall, Nottingham	13	25	Design of flat-bar-stiffened plating against local buckling	22	18
Brown, N D			Davidson, P C		
A fresh look at the wind-moment method.	16	22	Local critical buckling of flat-bar-stiffened plating	19	23
			Davies, J M		
			Stressed skin action of modern steel roof systems.	21	30
			Davies, Tony		
			Promoting the concept of sustainable development – Viewpoint	13	13
			Debney, P M		
			CAD – today is only just the beginning – Feature	3	16

	Issue	Page		Issue	Page
Dibb-Fuller, D			L		
Windsor Castle: fire behaviour and restoration aspects of historic iron work – Discussion	6	24	Lark, R		
Dickson, M G T			The refurbishment of Newport Transporter Bridge	16	15
The post-tensioned, prestressed Ketton stone perimeter frame of The Queen’s Building Emmanuel College, Cambridge . .	20	19	Lawson, R M		
Doran, D			‘Slimflor’ and ‘Slimdek’ construction: European developments	8	22
Cardington testing seminar updates results of tests – Report	14	10	Stressed skin action of modern steel systems	21	30
Duncan, I			Lee, M M K		
A Wise view, and a virtuoso performance: The Easter Holiday Lecture	11	8	The Department of Civil Engineering, University of Wales, Swansea – Academia	11	22
E			Lennon, T		
Ellick, J C A			The behaviour of full-scale steel-framed buildings subjected to compartment fires	8	15
The effect of geometry on the natural vibrations of masonry arch rings	11	26	Liddell, W I		
Fewtrell, R			The design and construction of the Millennium dome	7	18
Windsor Castle: fire behaviour and restoration aspects of historic ironwork – Discussion	6	24	Locke, Joe		
G			The design of steel structures – questioning the code	23/24	14
Gardner, P			Long, P		
The IT Revolution: Computer aided engineering – the implications for education and training	17	18	Partnering agreements – Legal column	4	12
Gardner, P J			Lu, Z		
IT in engineering consultancies – Feature	3	13	A theory of structural vulnerability	18	17
Gay, John Ernest			Lupton, J		
Information technology: e-mail for smaller consultants . . .	16	11	Spreadsheets and the structural engineer – Feature	3	21
Gibbs, P			Lyness, J F		
Cathodic protection of early steel-framed buildings – Technical note	10	11	The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge . . .	23/24	38
Gilbert, J			Lynsdale, C J		
Discipline and punishment: Policies and procedures	22	14	Strengthening for shear of RC beams by external plate bonding	12	19
Gohnert, M			M		
Bursting forces in reinforced concrete columns.	23/24	35	MacLeod, I A		
Goodchild, C H			Information technology for the structural engineer	3	23
Spreadsheets and the structural engineer – Feature	3	21	Marti, P		
Grafensteiner, Camenzind			A simple, consistent approach to structural concrete	8	20
The hall of light	11	16	Mawson, B R		
Green, M			The refurbishment of Newport Transporter Bridge	16	15
Fire safety engineering – the role of the structural engineer	19	18	McCullough, W P		
H			The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge . . .	23/24	38
Hislop, P J			McFarland, B		
Pyramid, perimeters, and poles: timber solutions for modern buildings in an Anglo-Saxon village.	15	15	The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge . . .	23/24	38
Hughes, A F			Meagher, R J		
A fresh look at the wind-moment method	16	22	The choice of stability functions in second-order analysis . . .	6	21
Hurst, B L			Mettem, C		
An iron lineage – Sutherland History Lecture – Discussion	10	17	Demystifying limit states design in timber	15	13
J			Better construction through the potential of timber I-beams	15	19
Jofeh, C			Bonded-in rods for timber structures: a versatile method for achieving structural connections	15	24
Glass: an elusive material for engineers – Report	8	15	Miller, P W		
Jolly, C K			The design and construction of the Millennium Dome . . .	7	18
Prospects for the Prospect Room: the proposed strengthening of an Elizabethan timber floor at the Wollaton Hall, Nottingham.	13	25	Milner, M		
K			Pyramid, perimeters, and poles: timber solutions for modern buildings in an Anglo-Saxon village.	15	15
Kong, F K			Better construction through the potential of timber I-beams	15	19
Large-scale tests on slender reinforced concrete columns – Correspondence	23/24	42	Moir, A H M		
Kumar, A			Energy-efficient design: a holistic approach. – Honorary Fellowship Address	2	13
Decks slab continuity for composite bridges – Correspondence	14	24	Moncrieff, M		
Kumar, B			Reducing design/construction disputes – Viewpoint	8	9
Information technology for the structural engineer	3	23	Moore, D B		
			The behaviour of full-scale steel-framed buildings subjected to compartment fires	8	15
			Morris, C		
			Bursting forces in reinforced concrete columns.	23/24	35
			Mukhopadhyaya, P		
			Strengthening for shear of RC beams by external plate bonding	12	19

	Issue	Page		Issue	Page
Mullett, D L			On top of the Millennium Dome – Project	7	14
‘Slimflor’ and ‘Slimdek’ construction: European developments	8	22	The environmental case for steel.	10	9
			A Singapore life – Interview	12	10
			On top of the Millennium Dome – Project	7	14
N			Safety issues in the design of sports structures – Analysis	11	13
Newman, J B			Temporary demountable structures: are expectations of performance too great?	12	15
The design of external, reinforced concrete beam-column joints	23/24	21	Svensson, H S		
			The twin cable-stayed Houston Ship Channel Bridge	5	13
O			Swamy, R N		
O’Brien, E J			Strengthening for shear of RC beams by external plate bonding	12	19
Design and analysis of concrete slabs using a modified strip method – Correspondence	8	27	Swift, R		
O’Dwyer, D W			Windsor Castle: fire behaviour and restoration aspects of historic ironwork – Discussion	6	24
Design and analysis of concrete slabs using a modified strip method – Correspondence	8	27			
P			T		
Parker, J			Tan, K H		
Angel’s wings and cotton reels – Project	19	13	Shear behaviour and analysis of partially prestressed I-girders	23/24	28
Patrick, M			Taylor, H P J		
The bridge that carries a park – Project	5	9	The precast concrete bridge beam: the first 50 years – Discussion	15	28
Pretlove, A J		 – Correspondence	18	30
The effect of geometry on the natural vibrations of masonry arch rings	11	26	Thaumasite Expert Group		
R			The structural implications of the thaumasite form of sulfate attack – Technical note	4	10
Raven, G			Tietz, S B		
Integrating culture and technology	1	16	From Egan to the 21st century – Viewpoint	7	10
Discussion.	17	29	Demystifying limit states design in timber	15	13
Rawstron,			Risk analysis: uses and abuses – Discussion	12	31
Design liability and the law of compromise – Legal column	13	10	The Woolf reforms and civil procedures rules – Guidance note	21	14
Using adjudication to resolve disputes – Legal column	7	6	Tong, K		
Richards, M			Shear behaviour and analysis of partially prestressed I-girders	23/24	28
Integrating culture and technology	1	16	Turnbull, D B		
Discussion	17	29	Better construction through the potential of timber I-beams	15	19
Roberts, J M			Pyramid, perimeters, and poles: timber solutions for modern buildings in an Anglo-Saxon village.	15	15
Demolition of Marks & Spencer, Manchester	2	20	Tye, K		
Discussion	20	30	Collateral warranties face uncertain future – Legal column	11	6
Promoting the profession: – Presidential Address	20	14			
Seizing the opportunities	11	9	V		
The ride of the century: The British Airways London Eye	11	18	Vollum, R L		
Robinson, M J			The design of external, reinforced concrete beam-column joints.	23/24	21
Investigation, appraisal, and reuse, of a cast-iron structural frame – Discussion	8	31	W		
S			Watermeyer, R B		
Sainsbury of Turville, Lord			Socio-economic responsibilities – the challenge facing structural engineers.	17	22
Seizing the opportunities	11	9	Webber, K		
Sarveswaran, V			Bursting forces in reinforced concrete columns.	23/24	35
Structural assessment of corrosion-damaged steel beams using minimum capacity curves	14	17	Werran, G R		
Scott, D			The post-tensioned, prestressed Ketton stone perimeter frame of The Queen’s Building Emmanuel College, Cambridge	20	19
A knowledge-based system for the engineering management of subsidence cases.	3	26	Woodman, N J		
Smethurst, G			A theory of structural vulnerability	18	17
Obituaries: Finlay McNaughton	9	11	Wright, P J		
Smith, A K			‘Slimflor’ and ‘Slimdek’ construction: European developments	8	22
The refurbishment of Newport Transporter Bridge	16	15	Y		
Smith, J W			Yu, Y		
Structural assessment of corrosion-damaged steel beams using minimum capacity curves	14	17	A theory of structural vulnerability	18	17
Soothill, K					
Discipline and punishment: Policies and procedures	22	14			
Stansfield, K					
British Museum: the Great Court – Project	6	10			
Constructing a sustainable environment – Report	8	10			

	Issue	Page		Issue	Page
Acoustics			Biographies		
The post-tensioned, prestressed Ketton stone perimeter frame of The Queen's Building Emmanuel College, Cambridge	20	19	A Singapore life – Interview	12	10
Adhesives			A Wise view, and a virtuoso performance	11	8
Bonded-in rods for timber structures: a versatile method for achieving structural connections	15	24	Bridging the design/education gap	17	16
Getting connected: the structural use of adhesives – Report	1	10	Raising the profile – Interview	18	14
Adjudication			Taking the lead – Interview	23/24	13
Using adjudication to resolve disputes . . . – Legal column	7	6	The President 1999–2000: Riding high: John Roberts	18	13
Aldershot Military Training Facility			Blast		
A swim fit for the military: Aldershot training facility . . .	16	12	Demolition of Marks & Spencer, Manchester (a six-storey commercial building supported by post-tensioned beams)	2	20
Alkalis			Discussion	20	30
The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge. . .	23/24	38	Bonding		
Aluminium			Bonded-in rods for timber structures: a versatile method for achieving structural connections	15	24
On top of the Millennium Dome – Project	7	14	Boxbeams		
Anglo-Saxon village			The twin cable-stayed Houston Ship Channel Bridge	5	13
Pyramid, perimeters, and poles: timber solutions for modern buildings in an Anglo-Saxon village	15	15	Braehead Centre, Glasgow		
Appraising			The Braehead Centre – a glass roof – Project	8	17
Investigation, appraisal, and reuse, of a cast-iron structural frame – Discussion	8	31	Bridges		
Protecting our piers	13	16	Angel's wings and cotton reels – Project	19	13
Safety issues in the design of sports structures – Analysis	11	13	Assessment of creep and shrinkage of concrete for the Flintshire Bridge	5	21
The effect of geometry on the natural vibrations of masonry arch rings	11	26	Decks slab continuity for composite bridges – Correspondence	14/2	24
Windsor Castle: fire behaviour and restoration aspects of historic ironwork – Discussion	6	24	The effect of geometry on the natural vibrations of masonry arch rings	11	26
Arbitration Act 1996			The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge . . .	23/24	38
Using adjudication to resolve disputes . . . – Legal column	7	6	The precast concrete bridge beam: the first 50 years – Discussion	15	28
Arches		 – Correspondence	18	30
The effect of geometry on the natural vibrations of masonry arch rings	11	26	The refurbishment of Newport Transporter Bridge	16	15
Architecture			The twin cable-stayed Houston Ship Channel Bridge	5	13
Pyramid, perimeters, and poles: timber solutions for modern buildings in an Anglo-Saxon village	15	15	Size matters for structural engineers – Gold Medal Address	21	23
The hall of light	11	16	British Airways London Eye		
Australia			A triumph of design	23/24	12
A search for wider horizons	14	13	Eyeing up London	19	5
Axle loads			Size matters for structural engineers – Gold Medal Address	21	23
The effect of geometry on the natural vibrations of masonry arch rings	11	26	British Museum, Great Court	21	23
B			British Museum: the Great Court – Project	6	10
Bann River Bridge, Northern Ireland			Brittany Parliament, Rennes		
The independent assessment of electrochemical chloride extraction treatment on a 30 year old motorway bridge. . .	23	38	Reconstructing the Brittany parliament – Project	1	11
Beams			Brittle fracture		
Better construction through the potential of timber I-beams	15	19	Size matters for structural engineers – Gold Medal Address	21	23
Shear behaviour and analysis of partially prestressed I-girders	23/24	28	Buchholz Sports Centre, Switzerland		
'Slimflor' and 'Slimdek' construction: European developments	8	22	The hall of light	11	16
Stainless steel in fire – Research report	19	16	Buckling		
Strengthening for shear of RC beams by external plate bonding	12	19	Design of flat-bar-stiffened plating against local buckling . .	22	18
The design of external, reinforced concrete beam-column joints	23/24	21	Local critical buckling of flat-bar-stiffened plating	19	23
The precast concrete bridge beam: the first 50 years – Discussion	15	28	Stressed skin action of modern steel roof systems	21	30
. – Correspondence	18	30	Structural assessment of corrosion-damaged steel beams using minimum capacity curves	14	17
Bearings			The behaviour of full-scale steel-framed buildings subjected to compartment fires	8	15
The twin cable-stayed Houston Ship Channel Bridge	5	13	The precast concrete bridge beam: the first 50 years – Discussion	15	28
		 – Correspondence	18	30
