

the STRUCTURAL engineer

INDEX Volume 78, 2000

AUTHOR INDEX

	Issue	Page		Issue	Page
A			Local critical buckling of bulb-flat-stiffened plating	8	24
Allen, H			Chen, N B		
Engineering education in the 21st century.	17	17	Prefabrication technology for upgrading public housing in Singapore: a case study of Chin Swee Upgrading Precinct	7	18
Anderson, D			Chiew, S P		
Design rotation capacity of composite joints.			General parametric design equations for SCFs in steel, multiplanar tubular XT-joints	21	32
Ansell, M P	6	25	Choo, B S		
Evaluation of double shear-joints for timber structures using pultruded GRP dowels, and implications for EC5-based design.	12	18	A study of scale effects in masonry arch bridges: is testing of large-scale structures still necessary?	5	24
			Testing of nailplated timber joints to study the influence of gap width on buckling strength.	15	23
B			Chou, S K G		
Bailey, C G			Design of flat-bulb-stiffened plating	18	24
The behaviour of full-scale steel-framed buildings subjected to compartment fires – Correspondence	3	33	Local critical buckling of bulb-flat-stiffened plating	8	24
The structural behaviour of steel frames with composite floorslabs subject to fire: Part 1: Theory.	11	19	Chuang, P H		
The structural behaviour of steel frames with composite floorslabs subject to fire: Part 2: Design	11	28	Slender columns in high strength concrete and normal strength concrete: BS 8110 and EC2 compared	23/24	24
Baird, J			Clancy, Brian		
Eliminating bow in timber	15	13	Why bother with CPD?.	5	13
Beal, A N			Corley, W G		
Who invented Young's Modulus?	14	27	Cable-supported bridges and structures: health & safety monitoring and problem solving	9	17
Bird, A B			Cowan, P		
Off-the-frame brickwork: Winterton House, London.	10	26	The Contracts (Rights of Third Parties) Act 1999	8	13
Blockley, D			JCT Amendment 2: new features on the way – Legal column	5	8
Puente Duarte Bridge: an unusual challenge!	5	11			
Blow, C			D		
Successful structural design within an alliance contract	22	15	Davies, J M		
Broderick, B M			Steel framed house construction	6	17
Seismic resistance of flush endplate connections	17	28	Deavy, C P		
Brown, D			The new parliamentary building – Portcullis House	18	17
Design resistance of kidney-shaped, slotted connections.	6	13	Desai, S B		
Brown, T G			Limits on loadcarrying capacity of flat slabs	22	26
Ice loads on the piers of Confederation Bridge, Canada	5	18	Dietermann, M		
Bugmann, G			Testing of nailplated timber joints to study the influence of gap width on buckling strength.	15	23
Artificial neural networks to aid conceptual design.	3	25	Dishman, T J		
Burland, J B			The demolition of Tsing Yi power station, Hong Kong	23/24	29
Ground-structure interaction: does the answer lie in the soil?	23/24	42	Dobson, R		
Butler, A K			Powerful analysis software needs skilled users	12	11
The potential for using some alternative aggregates in structural concrete	22	22	Doran, David		
			Eurocodes provoke lively debate.	13	6
C			Messina Bridge: report: IABSE annual lecture	4	11
Campbell, P			New standard for service-life planning	19	8
The European concrete building project	2	12	Seismic bridge design and retrofit – Conference report	15	6
Chana, P			Drake, R D		
The European concrete building project	2	12	Evaluation of double shear-joints for timber structures using pultruded GRP dowels, and implications for EC5-based design	12	28
Chapman, J C					
Collapse of the Ramsgate Walkway – Discussion	4	22			
Design of flat-bulb-stiffened plating	18	24			
Learning from failures	9	23			

	Issue	Page		Issue	Page
E			K		
Easterbrook, D J			Kennedy, I		
Artificial neural networks to aid conceptual design.	3	25	Taking structural testing to the limits	13	15
Eaton, K			Kong, F K		
An alternative career. Profile: Dr Keith Eaton.	21	12	Slender columns in high strength concrete and normal strength concrete: BS 8110 and EC2 compared.	23/24	34
Ellis, B R			Kumar, B		
On the response of long-span floors to walking loads generated by individuals and crowds	10	17	Computer-based structural design and conformance checking	3	21
F			L		
Falz, T			Lark, R J		
Testing of nailplated timber joints to study the influence of gap width on buckling strength.	15	23	The refurbishment of Newport Transporter Bridge	20	30
Fewtrell, A			Lau, J M		
Roped access: reaching the parts others can't	22	11	Prefabrication technology for upgrading public housing in Singapore: a case study of Chin Swee Upgrading Precinct	7	18
G			Law, K H		
Gardner, P			Planning, design and construction of PSA's container terminals.	2	16
Computer toolkit for small consultancies	3	16	Leek, D S		
Gay, J			The potential for using some alternative aggregates in structural concrete.	22	22
Computer toolkit for small consultancies	3	16	Lennon, T		
Gettins, H J			The behaviour of full-scale steel-framed buildings subjected to compartment fires – Correspondence	3	30
Construction of the passenger terminal roof at Chek Lap Kok, Hong Kong	16	17	Liddell, W I		
Gower, M R			The design and construction of the Millennium Dome – Discussion	19	29
Cathodic protection and condition monitoring: residential tower block, North Lanarkshire	8	18	Lillistone, D		
Grant, M			An innovative form of reinforcement for concrete columns using advanced composites.	23/24	20
Dealing with contamination: the real issues	14	15	Locke, J		
H			Survey reveals deep concern about EC3	4	6
Hankin, R			M		
The design of Westminster Station (Jubilee Line Extension)	19	19	MacLeod, I A		
Harris, R			Computer-based structural design and conformance checking	3	21
Lateral-torsional buckling of steel beams in domestic buildings: – Technical Note	7	13	Mao, W Y		
Helme, G			Strengthening an existing berth from 8900 DWT to 35 000 DWT	2	22
Difficulties in the quantitative assessment of contaminated land	14	17	Matthews, S L		
Hill, J			Deployment of instrumentation for in-service monitoring .	13	28
A President's view	18	13	Mawson, B R		
Hirst, J G			The refurbishment of newport transporter bridge.	20	30
Tate Modern	41	15	McDonald, L		
Hitchens, M J			Hydraulic lime mortar for the house of the future	19	12
Off-the-frame brickwork: Winterton House, London.	10	26	McLaughlan, D		
Ho, K M			Design and construction of the Millennium Stadium, Cardiff	20	22
Planning, design and construction of PSA's container terminals	2	16	Mehrabi, A		
Hobbs, H R			Cable-supported bridges and structures: health & safety monitoring and problem solving	9	17
Puente Duarte Suspension Bridge strengthening	1	29	Messenger, A G		
Hodges, R H			The 'bookend' effect.	13	19
Successful structural design within an alliance contract	22	15	Miller, P W		
Hogg, V			The design and construction of the Millennium Dome – Discussion	19	29
A study of scale effects in masonry arch bridges: is testing of large-scale structures still necessary?	5	24	Mitchell, D M		
J			The new parliamentary building – Portcullis House	18	17
Johnson, R			Moore, D B		
Contaminated land: the new legislative regime	6	10	The behaviour of full-scale steel-framed buildings subjected to compartment fires – Correspondence	3	33
Johnston, R A			The structural behaviour of steel frames with composite floorslabs subject to fire: Part 1: Theory	11	19
The potential for using some alternative aggregates in structural concrete	22	22	The structural behaviour of steel frames with composite floorslabs subject to fire: Part 2: Design	11	28
Jolly, C K			J		
An innovative form of reinforcement for concrete columns using advanced composites.	23/24	20	J		
Jones, R			J		
Replacement of decayed beam ends with epoxy-bonded timber composites: structural testing.	15	19	J		

	Issue	Page		Issue	Page
Morris, J M			Svensson, H S		
An overview of the design of the AAT Air-Cargo Handling Terminal, Hong Kong	16	23	The twin cable-stayed Houston Ship Channel Bridge – Discussion	2	27
N			Fritz Leonhardt 1909–1999: obituary	4	10
Neil, F			Swamy, R		
Design of steel fibre floors: problems and pitfalls	11	14	Educating engineers: meeting the sustainability challenge.	17	13
O			T		
O'Donnell, M A			Tay, H H		
Successful structural design within an alliance contract.	22	15	Prefabrication technology for upgrading public housing in Singapore: a case study of Chin Swee Upgrading Precinct	7	18
Ong, G S			Tellet, John		
Strengthening an existing berth from 8900 DWT to 35 000 DWT.	2	22	Power station to Tate Modern gallery – Report	8	6
Orton, A			Thompson, I		
Tubular columns boost multi-storey construction.	21	20	Australia Stadium: for the Olympics and beyond	16	11
Otlet, M			Thomson, A I		
Design and construction of the Millennium Stadium, Cardiff	20	22	Computer-based structural design and conformance checking	3	21
Owens, Graham			Thomson, A W		
Young Engineers' Conference 2000 – Report	10	6	Seismic resistance of flush endplate connections.	17	28
P			Thornton, J A		
Paterson, I			The new parliamentary building – Portcullis House	18	17
Scottish parliament in the making – Report	8	10	U		
Perry, S H			Ushio, Y		
The impact behaviour of sleeved concrete cylinders	17	23	Construction of the passenger terminal roof at Chek Lap Kok, Hong Kong	16	17
Porteous, A			W		
The design and construction of seismically-qualified steel caissons at Rosyth Royal Dockyard.	21	24	Wainwright, F		
Prichard, S J			Tate Modern	4	15
The impact behaviour of sleeved concrete cylinders	17	23	Williams, I		
R			A new spirit of co-operation	3	12
Rafiq, M Y			Windsor, D M		
Artificial neural networks to aid conceptual design	3	25	Catholic protection and condition monitoring: residential tower block, North Lanarkshire.	8	18
Rawstron, Andrew			Wise, C		
When refusal to pay is unjust. – Legal column	3	6	People: structure: engineering – standing on the shoulders of giants	1	24
Reffold, A			Wong, K Y		
Testing of nailed timber joints to study the influence of gap width on buckling strength	15	23	Planning, design and construction of PSA's container terminals.	2	16
Richardson, C			Wong, S T		
The 'bookend' effect	13	19	Strengthening an existing berth from 8900 DWT to 35 000 DWT	2	22
S			Wood, M		
Seifert, J			Dealing with contamination: the real issues.	14	15
Computer toolkit for small consultancies	3	16	Wright, I		
Shaw, J M			Successful structural design within an alliance contract	22	15
Tate Modern	4	15	Wu, N W		
Smedley, D			General parametric design equations for SCFs in steel, multiplanar tubular XT-joints	21	32
Replacement of decayed beam ends with epoxy-bonded timber composites: structural testing	15	19			
Smith, A K					
The refurbishment of Newport Transporter Bridge	20	30			
Soh, C K					
General parametric design equations for SCFs in steel, multiplanar tubular XT-joints	21	32			
Stagg, B					
High-rise public housing – Report	22	8			
Stansfield, K					
Cladding: the case for improving inspection	9	15			
Creative thinking in precast concrete.					
Shaping the world – Annual dinner report	23/24	16			
Sustainable inquiry sets challenge for engineers of future	14	5			
The biggest greenhouse in the world	21	15			
Corridors of power	16	8			
Sutherland, J					
Secrets of the Forest of Dean unearthed: History Group study visit.	16	6			
A century of innovation: structural engineering 1900–2000	1	12			

	Issue	Page		Issue	Page
A			Seismic bridge design and retrofit . . . – Conference report	15	6
Aggregates			The Merle Bridge: rustic and timeless	15	11
The potential for using some alternative aggregates in structural concrete	22	22	The Refurbishment of Newport Transporter Bridge	20	30
Airports			The twin cable-stayed Houston Ship Channel Bridge – Discussion	2	27
An overview of the design of the AAT Air-Cargo Handling Terminal, Hong Kong	16	23	Bridgemill Bridge		
Construction of the passenger terminal roof at Chek Lap Kok, Hong Kong	16	17	A study of scale effects in masonry arch bridges: is testing of large-scale structures still necessary?	5	24
Aluminium			Brittle fracture		
A century of innovation: structural engineering 1900–2000	1	12	Learning from failures	9	23
Dublin’s Millennium Bridge	17	6	Bronze		
Analysis			The new parliamentary building – Portcullis House	18	17
Computer toolkit for small consultancies	3	16	BS ISO 15686		
Powerful analysis software needs skilled users	12	11	New standard for service-life planning	19	8
Arches			BS 5400		
Restoring the Dobson roofs	14	12	Local critical buckling of bulb-flat-stiffened plating	8	24
The new parliamentary building – Portcullis House	18	17			
Awards			C		
David Alsop Award made for first time	4	5	Cable stayed bridges		
Institution Gold Medal awarded to dome designer	2	5	A century of innovation: structural engineering 1900–2000	1	12
Model analysis awards	1	7	The twin cable-stayed Houston Ship Channel Bridge – Discussion	2	27
New award for young structural engineers	8	8	Cable stayed structures		
Service Awards	5	6	Cable-supported bridges and structures: health & safety monitoring and problem solving	9	17
Sessional Awards	1	7	The design and construction of the Millennium Dome – Discussion	19	29
B			CAD		
Bankside Power Station			Artificial neural networks to aid conceptual design	3	25
Tate Modern	4	15	Computer-based structural design and conformance checking	3	21
Bargower Bridge			Powerful analysis software needs skilled users	12	11
A study of scale effects in masonry arch bridges: is testing of large-scale structures still necessary?	5	24	Caissons		
Beams			The design and construction of seismically-qualified steel caissons at Rosyth Royal Dockyard	21	24
Lateral-torsional buckling of steel beams in domestic buildings: – Technical Note			Canopy roofs		
Replacement of decayed beam ends with epoxy-bonded timber composites: structural testing	7	13	Australia Stadium: for the Olympics and beyond	16	11
Bearings			Car parks		
Collapse of the Ramsgate Walkway – Discussion	4	22	Ground-structure interaction: does the answer lie in the soil	23/24	42
The twin cable-stayed Houston Ship Channel Bridge – Discussion	2	27	Carbonation		
Bending moment			Cathodic protection and condition monitoring: residential tower block, N Lanarkshire	8	18
Taking structural testing to the limits	13	15	Cathedrals		
Berths			Secrets of the Forest of Dean unearthed: History Group study visit	16	6
Strengthening an existing berth from 8900 DWT to 35 000 DWT	2	22	Cathodic protection		
Bolts			Cathodic protection and condition monitoring: residential tower block, N Lanarkshire	8	18
Seismic resistance of flush endplate connections	17	28	Chek Lap Kok Airport, Hong Kong		
Box beams			An overview of the design of the AAT Air-Cargo Handling Terminal, Hong Kong	16	23
The Merle Bridge: rustic and timeless	15	11	Chimneys		
The twin cable-stayed Houston Ship Channel Bridge – Discussion	2	27	The Demolition of Tsing Yi Power Station, Hong Kong	23/24	29
Bridges			Cladding		
A century of innovation: structural engineering 1900–2000	1	12	Cladding: the case for improving inspection	9	15
A study of scale effects in masonry arch bridges: is testing of large-scale structures still necessary?	5	24	Creative thinking in precast concrete	23/24	16
Bridge design and management	20	12	The biggest greenhouse in the world	21	15
