

INDEX – VOLUME 80, 2002

AUTHOR INDEX

	Issue	Page		Issue	Page
A					
Al-Qarra, H Strand by strand installation of cable stays	10	31	Burden, A The structural design of a cross-linked reinforced concrete building in Sendai, Japan	15	31
Alexander, S J Imposed floor loading for offices: a re-appraisal	23/24	35	Burgess, I W Modelling of six full-scale fire tests on a composite building	19	30
Alder, G Insulated render and cladding helps meet new regulations	15	19	Byfield, M P Analysis of composite beams with widely spaced shear connectors	13	31
Allen, J Tackling the skills shortage	7	18	Effect of strain hardening on flexural properties of steel beams	8	29
Arnott, K Design codes for engineers or computers? [Technical note]	23/24	21	Strength and ductility of composite connections	20	18
B					
Bailey, C G Simplified wind net pressure coefficients for the design of portal frames	4	21	C		
Balestra, J F A creative solution for two bridges: widening the span of two existing bridges by eliminating three internal supports	10	25	Camilleri, D Fixity moment induced on masonry walling	20	15
Barrett, R The structural design of the hotel for the Marques de Riscal Winery, Spain	13	23	Rethinking engineering: risk and reliability analysis	8	13
Batty, P The Royal Court Theatre, London: keeping the essence of the building	9	20	Carpenter, J Reflections on structural safety [Viewpoint]	8	11
Beal, A N The leaning towers of Adel: stabilising the Seven Arches Aqueduct	9	27	Chan, S L Behaviour-based design of scaffolding against instability	10	8
Benaim, R A systematic approach to refurbishment [Technical note]	9	14	Chapman, J The state of engineering [Honorary Fellow's Address]	6	7
Blette, K The structural design of the hotel for the Marques de Riscal Winery, Spain	13	23	Chapman, J C An innovative steel / concrete construction system	20	33
Blockley, D Civil/structural engineers and maths: the changing relationship	7	14	Charnich, B Reach for the sky	8	15
The President's Year 2001-2002: getting the message across	18	11	Cheng, H 2002 Gold Medal Address: From East to West and back	18	30
Boileau, A Avoiding pitfalls and risk factors in below ground waterproofing [Technical note]	11	16	Choi, M Anchorage zones for FRP prestressed concrete structures [Research update]	6	14
Bolton, A Steelwork design codes	10	16	Clift, M Clifford Evans remembered [Obituary]	22	12
Bowerman, H An innovative steel / concrete construction system	20	33	Cook, N J Parametric calibration of BS6399-2:1997 – wind loads on rails and purlins	4	29
Brettle, M E A revised ground snow loading map for the UK	22	25	Snow loading in the UK and Eire: combination of actions given in the Eurocodes	12	26
Snow loading in the UK and Eire: combination of actions given in Eurocodes	12	26	Cook, R Nam Cheong station, Hong Kong	11	13
Snow loading in the UK and Eire: ground snow load map	12	18,24	Couchman, G Light steel framed modular construction for housing	21	17
			Coyle, N An innovative steel / concrete construction system	20	33
			Crockett, R When you speak, does anyone listen?	22	13
			Crowley, A Electronic technical information: the opportunity it provides for structural engineers to improve their performance (if only we knew what we knew)	7	24

	Issue	Page		Issue	Page
Currie, D M			Feng, M		
Snow loading in the UK and Eire: combination of actions given in the Eurocodes	12	26	Cold-formed thin-walled steel structures in fire	19	26
Snow loading in the UK and Eire: ground snow load map	12	18,24	Firth, I P T		
			A tale of two bridges: the Lockmeadow and Halgavor bridges	5	26
D			Flint, A		
Dallard, P			The London Millennium Footbridge [Correspondence]	22	31
The London Millennium Footbridge [Correspondence]	22	31	Frias, M A		
Darling, A			The structural design of the hotel for the Marques de Riscal Winery, Spain	13	23
Redevelopment of Knightsbridge Crown Court for Harrods	11	21	Fried, A N		
Davies, D			Design of plain masonry basements walls	11	28
Engineers, engineering and the evolving profession	7	31	G		
Engineers, engineering and the evolving profession [Discussion]	7	36	Gardner, L		
The state of engineering [Honorary Fellow's Address]	6	7	Improved stainless steel structural design [Research update]	6	15
Davies, J M			Gilbert, S G		
Cold-formed thin-walled steel structures in fire	19	26	The 'Belfast' timber roof truss - Is it sustainable and relevant today?	17	37
Deam, B L			Gilfillan, J R		
The behaviour of structures in earthquakes	19	14	The 'Belfast' timber roof truss - Is it sustainable and relevant today?	17	37
Del Carril, T			Godfrey, P S		
A Creative solution for two bridges: widening the span of two existing bridges by eliminating three internal supports	10	25	Benefiting from risk: adding value	8	20
Desai, S			Gomez, C C		
Brian Scruby 1912-2002 [Obituary]	18	10	The structural design of the hotel for the Marques de Riscal Winery, Spain	13	23
Fitch beams with short length steel plates [Technical note]	12	14	H		
Dhanalakshmi, M			Hadker, D		
Strength and ductility of composite connections	20	18	IMAX dome: a first for Mumbai	14	17
Dias, W P S			Harris, R		
The aesthetics of proportion in structural form	14	22	Building on timber codes and standards	17	31
Dickson, M			Harvey, B		
Engineering buildings for a small planet: towards construction without depletion [Discussion]	10	36	Arch bridge assessment: an issue of confidence	5	13
Dobson, R			Hettiarachchi, M T P		
A training agenda for new technology	7	20	The aesthetics of proportion in structural form	14	22
Doran, D			Heyne, A		
R J W Milne 1929-2002 [Obituary]	23/24	10	Back to the future: building a strawbale house	16	15
Dougill, J			Hicks, S		
Dr Chan-Wah ('Joe') Yu 'a remarkable mixture of technical input and personal skills' [Obituary]	10	12	Trends in modern floor construction	21	22
Downing, M			Hill, J		
Cladding with precast concrete [Technical note]	15	15	The plan: what plan? An Institution for 2010	9	10
Duraisingam, S			Ho, J C M		
The structural design of the hotel for the Marques de Riscal Winery, Spain	13	23	Flexural strength and ductility performance reinforced concrete of high-strength columns	23/24	26
E			Ultimate concrete strain and equivalent rectangular stress block for design of high-strength concrete beams	16	26
Eaton, K			Hosle, J		
Institution membership trends [Structural news]	6	10	Legal framework for partnering [Legal column]	13	6
Elliott, G			Howson, W P		
The London Millennium Footbridge [Correspondence]	22	31	Modern aircraft hangars: a review of the design trends	15	23
Enjily, V			Huang, Z		
Encouraging innovation in the use of timber and glulam	17	12,15	Modelling of six full-scale fire tests on a composite building	19	30
F					
Fabsec Ltd					
Fire engineering of cellular beams using intumescent coatings	19	24			

	Issue	Page		Issue	Page
I			to users		
Ibell, T J			Mayes, J		
Anchorage zones for FRP prestressed concrete structures [Research update]	6	14	Using modular construction with a brick finish [Technical note]	15	16
J			McKittrick, B		
Jay, B			Frank Bowen 1911-2002 [Obituary]	4	8
A force for sustainability? [Correspondence]	20	39	The incoming President 2002-2003: grasping new opportunities	18	13
Johnson, R			The Institution – who cares? [Presidential Address]	20	25
A force for sustainability? [Correspondence]	20	39	Mello, C D		
The significance of cracks in low-rise buildings	20	19	IMAX dome: a first for Mumbai	14	17
Jones, K			Mettem, C		
Hounslow East Station: timber lamella roof structures	17	16	Building on timber codes and standards	17	31
K			Mizon, D		
Kealy, M			Bhairab bridge, Bangladesh	18	16
WTC disaster points up need for better collaboration on fire	19	19	Moran, J		
Kemp, A R			Electronic technical information: the opportunity it provides for structural engineers to improve their performance (if only we knew what we knew)	7	24
Effect of strain hardening on flexural properties of steel beams	8	29	Morgenthal, G		
Key, M			Synchronisation phenomena in bridge dynamics [Research update]	5	20
Disputed construction contracts: get it in writing [Legal column]	12	8	Moss, R		
King, D			Concrete frame construction at St George Wharf, London	23/24	13
Restoring the vision [Viewpoint]	7	16	N		
Kruger, H G			Nethercot, D A		
Crack width calculation to BS 8007 for combined flexure and direct tension	18	18	Design and development of a general cold-formed steel portal framing system	21	31
Kulasuriya, C			Design of non-sway composite frames	6	18
The aesthetics of proportion in structural form	14	22	Effect of strain hardening on flexural properties of steel beams	8	29
Kwan, A K H			Improved stainless steel structural design [Research update]	6	15
Ultimate concrete strain and equivalent rectangular stress block for design of high-strength concrete beams	16	26	O		
L			Owens, G		
Lay, S			Electronic technical information: the opportunity it provides for structural engineers to improve their performance (if only we knew what we knew)	7	24
WTC disaster points up need for better collaboration on fire	19	19	P		
Lazarus, D			Pam, H J		
Masonry facade retention	22	17	Flexural strength and ductility performance of high-strength reinforced concrete columns	23/24	26
Ledbetter, S R			Ultimate concrete strain and equivalent rectangular stress block for design of high-strength concrete beams	16	26
Facade engineering - what's behind the facade?	22	21	Paterson, J		
Lim, J B P			A systematic approach to refurbishment [Technical note]	9	14
Design and development of a general cold-formed steel portal framing system	21	31	Nam Cheong station, Hong Kong	11	13
Lindgren, J			Perez, F		
Sibelius Hall, Finland: a symphony in wood	17	19	The Structural design of the hotel for the Marques de Riscal Winery, Spain	13	23
