Author Index

<u>Author</u>	<u>Issue</u>	<u>Page</u>	
A			
Alexander, Stuart	New approach to disproportionate collapse [Viewpoint]	23/24	14
	Safety in steelwork [Technical note]	15	25
	What does designing for safety mean in practice? [Viewpoint]	15	13
Algaard, William	Assessing perforation limits of steel section impacts on reinforced concrete slabs [Technical note]	23/24	20
Allan, Andrew	Designers in the hall of blame [Viewpoint]	15	28
Anderson, Kevin	FEA of the biomechanics of porcine corneas	12	20
Armstrong, James	Responsibility and regulation: ethics - value and reward	21	40
Au, F T K	Effects of confinement on flexural strength and ductility design of HS concrete beams	23/24	38
B			
Baddoo, Nancy	Stainless steel in indoor swimming pool buildings [Technical note]	9	24
Bailey, Colin	Structural fire design: core or specialist subject?	9	32
Beal, Alasdair	A bit windy? Anomalies in BS6399-2 [Viewpoint]	22	25
	Structural safety uncertainties in codes of practice for reinforced concrete [Correspondence]	15	35
Beale & Company	Control of Asbestos at Work Regulations 2002 [Legal update]	15	14
Birchall, M J S	Membrane material behaviour: concepts, practice and developments	14	28
	Tensile fabric structures: concepts, practice and developments	14	21
Booth, Edmund	Earthquake engineering research in the UK [Research update]	16	14
	Eurocode8 and its implications for UK-based structural engineers	3	39
Brady, Malcolm	Royal Naval College	1	17
Breeze, Gordon	Dynamic response of buildings to wind loads - comparing Eurocode prEN1991-1-1-4 with other current UK methods	12	28

Brereton, Allan	Making your CPD return: a question of professional pride	6	15
Bridgens, B N	Membrane material behaviour: concepts, practice and developments	14	28
	Tensile fabric structures: concepts, practice and developments	14	21
Bright, S R	Fatigue performance of laser-welded steel bridge decks	21	31
Brohn, David	Understanding structural behaviour: a gap in the system [Viewpoint]	7	18
Brown, D W	A system for invention [Technical note]	6	17
Brown, J D	A system for invention [Technical note]	6	17
Brownjohn, James M W	Long span steel pedestrian bridge at Singapore Changi Airport - part1: prediction of vibration serviceability problems	16	21
	Long span steel pedestrian bridge at Singapore Changi Airport - part2: crowd loading tests and vibration mitigation measures	16	28
Bull, Stuart	Beijing Water Cube - the IT challenge	13	23
Bullman, Peter	Exams preparation	2	13
Burden, Alan	Three glass compression wall structures in Japan	10	27
Burgoyne, Chris	Are structures being repaired unnecessarily?	1	22
	Structures have relevance to biomedical research [Research update]	4	13
Burnside, Jane	Sharing imagination: educating designers of the future (the Imagine Programme)	7	26
Burr, Alan C	Recent developments in the use of FRP anchors and masonry wall strengthening techniques [Research update]	18	20
Butterworth, N	A new approach to specifying fire resistance periods	19	34
Byfield, M P	Design of steel framed buildings at risk from terrorist attack	22	31
<u>C</u>			
Campbell, Peter	Kenneth Severn 1918-2004 [Obituary]	9	8
Carpenter, John	Competency in structural engineering design [Viewpoint]	15	16
Carstairs, Neil	Bridging Hadrian's Wall	5	17
Chan, Alex	Shaft grouted friction barrette piles for a super high-rise building	20	32
Chan, C K	Prebored friction mini-pile foundation for light rail grade separation	20	24
Chan, George	Shaft grouted friction barrette piles for a super high-rise building	20	32
Chan, S T	Recent field study on the behaviour of jacked piles	20	19
Chapman, Tim	Achieving economy and reliability in piled foundation design for a building project	11	32

Chau, S L	Effects of confinement on flexural strength and ductility design of HS concrete beams	23/24	38
Cheong, Lim Kim	Designing slab for Mxy moments [Correspondence]	8	36
Chiari, Pelle	Bouncing the checks	13	17
Chow, Rex N	Pre-bored friction mini-pile foundation for light rail grade separation	20	24
Clambaneva, Stephan	Technology innovation in the construction industry [Viewpoint]	3	23
Clancy, Brian	Are 'structural surveys' proper engineering?	1	27
Concannon, Peter	The new look DTI Business and Innovation Support [Research update]	6	13
Cossons, Neil	Engineering a nation: celebrating the past [Maitland Lecture 2002]	8	25
Courage, W M G	Advanced finite element reliability analysis	13	33
Crewe, A J	IDEERS - Technical development of a design competition to inspire young people	7	31
Cutler, Peter	Stainless steel in indoor swimming pool buildings [Technical note]	9	24
D			
Dadswell, Doug	The Tusenfryd Thundercoaster	17	30
Daniell, W E	IDEERS - Technical development of a design competition to inspire young people	7	31
Desai, Satish	Flexure and shear in reinforced concrete members [Technical note]	23/24	25
	Fragile roofs: problems and potential solutions [Viewpoint]	4	20
	Tectonics in structural engineering [Viewpoint]	16	16
Downing, Steve	Beijing Water Cube - the IT challenge	13	23
E			
Eatherley, Michael	Royal Naval College	1	17
El-Sheikh, Ahmed	FEA of the biomechanics of porcine corneas	12	20
Ellicott, Graham	What's new in the fire world?	19	20
Ellis, B R	Loads generated by jumping crowds: numerical modelling	17	35
Ellison, Sean	Behaviour of blind bolted connections to concrete filled hollow sections [Model Analysis Award]	22	16
English, C	A new approach to specifying fire resistance periods	19	34
F			
Fan, Patrick	Designing slab for Mxy moments [Correspondence]	14	36
Farmer, Ian	Fitting an ellipse into a triangle	11	20
Feltham, Ian	Shear in reinforced concrete piles and	11	27

	circular columns		
Fernandez de Retana, Eduardo Aja	The strength of cast iron columns and the research work of Eaton Hodgkinson (1789-1861)	2	18
Fok, Paul	Long span steel pedestrian bridge at Singapore Changi Airport – part 1: prediction of vibration serviceability problems	16	21
	Long span steel pedestrian bridge at Singapore Changi Airport – part 2: crowd loading tests and vibration mitigation measures	16	28
Fordyce, Mike	Structural engineering - a passport to travel [Presidential address]	19	22
Fox, Tim	Using advanced engineering analysis in the design of concrete structures [Technical note]	3	20
Fung, W K	Assessment of load carrying capacity of driven piles - a practical approach	20	28
Furneaux, Christopher	Structural integrity monitoring by global positioning systems [Model Analysis Award]	4	25
G			
Gardner, L	Structural stainless steel design: a new approach	21	21
Gilbertson, Alan	Management of structures: aspirations and reality [Management of Structures Study Group colloquium]	22	14
	The Management of Structures Study Group	3	13
Gordon, Stuart R	Observations on the grillage analysis of slabs	3	35
Gosling, P D	Membrane material behaviour: concepts, practice and developments	14	28
	Tensile fabric structures: concepts, practice and developments	14	21
H			
Hall, Sarah	The behaviour of hollow section connections under seismic loading [Model Analysis Award]	4	22
Harris, Richard	21st Century timber engineering - the age of enlightenment for timber design: part 1: an introduction to timber	23/24	52
	Sustainability into reality: responsible use of timber [Technical update]	17	24
Harvey, Bill	Skew arch behaviour [Viewpoint]	5	13
Hasle, Ronan	Shaft grouted friction barrette piles for a super high-rise building	20	32
Hill, Iain G	Construction of the City of Manchester Stadium roof	2	24
Hislop, Patrick	Round pole construction: a traditional approach for the future [Technical note]	17	21
Holt, D A	Design for laps for deformed bars in concrete under bentonite and polymer drilling fluids	18	32
Hulme, Paul	Design and construction of Terminal 5 roof	18	25
Humphrey, Arthur T	Structural engineering modelling and analysis [Technical note]	3	28

Hussain, Naeem	Design of the Medway Viaduct	5	31
I			
IStructE	Implementation of the structural Eurocodes	15	21
IStructE Building Legislation Panel	Control of Asbestos at Work Regulations 2002 [Legal update]	15	14
Izatt, Conrad	Assessing perforation limits of steel section impacts on reinforced concrete slabs [Technical note]	23/24	20
J			
Jackson, Paul	Bann River bridge: radical surgery	5	25
Jenkins, W M	Structural design optimisation by evolution	13	29
Jeremiah, Keith	Building regs. - approved doc A	20	37
Ji, T	Loads generated by jumping crowds: numerical modelling	17	35
Jones, A E K	Design for laps for deformed bars in concrete under bentonite and polymer drilling fluids	18	32
Jones, Tony	Developments in post-tensioned flat slabs [Research update]	10	23
K			
Kirby, B R	A new approach to specifying fire resistance periods	19	34
	Calibration of Eurocode1: actions on structures - part 1.2: actions on structures exposed to fire	19	38
Kirk, Martin	Design of the Medway Viaduct	5	31
Knowles, Roger	Lessons for credit terms [Legal column]	4	10
Kotsovos, M D	Towards a more rational approach for assessing and rating concrete bridges	23/24	33
Krom, A H M	Advanced finite element reliability Analysis	13	33
Kwan, A K H	Effects of confinement on flexural strength and ductility design of HS concrete beams	23/24	38
L			
Lam, Kelvin	Shaft grouted friction barrette piles for a super high-rise building	20	32
Lau, Ringo	Shaft grouted friction barrette piles for a super high-rise building	20	32
Law, C W	Shaft grouted friction barrette piles for a super high-rise building	20	32
Lee, P K K	Recent field study on the behaviour of jacked piles	20	19
Lennon, Tom	Fire safety of concrete structures [Technical note]	6	22
Lui, James	Shaft grouted friction barrette piles for a super high-rise building	20	32
Lyle, John	Assessing perforation limits of steel section impacts on reinforced concrete	23/24	20

slabs [Technical note]

Lyons, Kevin The Optimum Sports Hall: a benchmark for the future 9 20

Tectonics in structural engineering [Viewpoint]	16	16

Arsenal Football Club, London

Fitting an ellipse into a triangle 11 20

Asbestos

Control of Asbestos at Work Regulations 2002 [Legal update] 15 14

Athens, Greece

Athens Olympics: the race for completion [Viewpoint] 9 14

Awards

HKIE/IStructE Joint Structural Division special awards 2004 20 16

B

Bann River Bridge, Northern Ireland

Bann River bridge: radical surgery 5 25

Barrettes

Shaft grouted friction barrette piles for a super high-rise building 20 32

Barriers

Design of the Medway Viaduct 5 31

Basements

The influence of enhanced excavation base stiffness on prop loads and movements during basement construction 4 30

BD44/95

Towards a more rational approach for assessing and rating concrete bridges 23/24 33

Beams

Effects of confinement on flexural strength and ductility design of HS concrete beams 23/24 38

Safety in steelwork [Technical note] 15 25

Bending moments

Designing slab for Mxy moments [Correspondence] 14 36

Designing slab for Mxy moments [Correspondence] 8 36

Bending strength

Effects of confinement on flexural strength and ductility design of HS concrete beams 23/24 38

Bentonite

Design for laps for deformed bars in concrete under bentonite and and polymer drilling fluids 18 32

Biographies

A new President - on the far side of the world [Interview] 18 16

Structural engineering - a passport to travel [Presidential address] 19 22

The man who loves bridges [profile of David Harvey] 5 20

Biology

Structures have relevance to biomedical research [Research update] 4 13

Biomechanics

FEA of the biomechanics of porcine corneas 12 20

Blast loading

Design of steel framed buildings at risk from terrorist attack 22 31

Recent developments in the use of FRP anchors and masonry wall strengthening techniques [Research update] 18 20

Bolts

Behaviour of blind bolted connections to concrete filled hollow sections [Model analysis award] 22 16

Bridges

Bann River bridge: radical surgery 5 25

Bridging Hadrian's Wall 5 17

Design and construction of modern concrete bridges 10 31

Fatigue performance of laser-welded steel bridge decks 21 31

Gatwick Passenger Bridge will be a planespotter's paradise 12 14

HKIE/IStructE Joint Structural Division special awards 2004 20 16

Long span steel pedestrian bridge at Singapore Changi Airport – Part 1: prediction of vibration serviceability problems 16 21

Long span steel pedestrian bridge at Singapore Changi Airport – Part 2: crowd loading tests and vibration mitigation measures 16 28

Paddington station - design and construction, 1850-1855 [Report: History Study Group] 14 15

Skew arch behaviour [Viewpoint] 5 13

Tackling the complexities of refurbishment 12 18

The man who loves bridges [profile of David Harvey] 5 20

Timber bridge revival [Technical note] 10 18

Towards a more rational approach for assessing and rating concrete bridges 23/24 33

Brunel, I K

Engineering a nation: celebrating the past [Maitland Lecture 2002] 8 25

Paddington station - design and construction, 1850-1855 [Report: History Study Group] 14 15

BS5531

Safety in steelwork [Technical note] 15 25

BS5950

Second order analysis of 3D structures [Technical note] 21 15

BS6399

A bit windy? Anomalies in BS6399-2 [Viewpoint] 22 25

Dynamic response of buildings to wind loads – comparing Eurocode prEN1991-1-1-4 with other current UK methods 12 28

Fragile roofs: problems and potential solutions [Viewpoint] 4 20

BS8110

EC2 and BS8110 compared 6 33

Effects of confinement on flexural strength and ductility design of HS concrete beams 23/24 38

Fire safety of concrete structures [Technical note] 6 22

Shear in reinforced concrete piles and circular columns 11 27

Structural safety uncertainties in codes of practice for reinforced concrete 8 28

Building Regulations

Building regs - approved doc A 20 37

Countdown to changes in the Scottish Building Regulations [Briefing note]	18	13
New approach to disproportionate collapse [Viewpoint]	23/24	14

Buildings

A new approach to specifying fire resistance periods	19	34
Are 'structural surveys' proper engineering?	1	27
Are 'structural surveys' proper engineering? [Discussion]	12	34
Control of Asbestos at Work Regulations 2002 [Legal update]	15	14
Dynamic response of buildings to wind loads – comparing Eurocode prEN1991-1-1-4 with other current UK methods	12	28
Eliminating design faults in buildings [Technical note]	13	14
New approach to disproportionate collapse [Viewpoint]	23/24	14
Structural building information modelling [Technical note]	13	20
Structural fire design: core or specialist subject?	9	32
Technology innovation in the construction industry [Viewpoint]	3	23
Three glass compression wall structures in Japan	10	27
What's new in the fire world?	19	20

Business

The new look DTI Business and Innovation Support [Research update]	6	13
The value of innovation	1	33
The value of innovation [Discussion]	8	34
What's in a (website) name?	13	19

C

CAD

Facing the T5 challenge	3	14
Working with 3D models: keeping it simple	21	14

Calibrating

Calibration of Eurocode1: actions on structures – part 1.2: actions on structures exposed to fire	19	38
EC1: Part 1.1: Densities, self-weight, imposed loads for buildings [Technical note]	2	10

Canal bridges

Paddington station - design and construction, 1850-1855 [Report: History Study Group]	14	15
---	----	----

Canopies

Tensile fabric structures: concepts, practice and developments	14	21
--	----	----

Capacity

Assessment of load carrying capacity of driven piles – a practical approach	20	28
Shaft grouted friction barrette piles for a super high-rise building	20	32
Towards a more rational approach for assessing and rating concrete bridges	23/24	33

Carbon dioxide

The modern face of lime [Viewpoint]	8	13
-------------------------------------	---	----

Case studies

Building safer road tunnels [Technical note]	19	17
Design and construction of modern concrete bridges	10	31
Fit for the future [Report]	17	18
How can geotechnics address sustainability?	11	18
Responsibility and regulation: ethics – value and reward	21	40
The value of innovation	1	33
The man who loves bridges [profile of David Harvey]	5	20

Cast iron

The strength of cast iron columns and the research work of Eaton Hodgkinson (1789-1861) 2 18

Catenaries

Construction of the City of Manchester Stadium roof 2 24

CDM

Demolition - assessing the risks and planning for safety 15 19
Designers in the hall of blame [Viewpoint] 15 28
Risk and liability for the professional engineer: a legal perspective [Discussion] 15 34

Central Artery Tunnel Project, Boston, USA

Boston 'Big Dig' Central Artery tunnel jacking paper [Discussion] 2 35

Certification

Countdown to changes in the Scottish Building Regulations [Briefing note] 18 13
Sustainability into reality: responsible use of timber [Technical update] 17 24

CFRP

An advanced polymer composite and concrete slab system [Young researcher] 16 12

Changi Mezzanine Bridge, Changi Airport, Singapore

Long span steel pedestrian bridge at Singapore Changi Airport – part 1: prediction of vibration serviceability problems 16 21
Long span steel pedestrian bridge at Singapore Changi Airport – part 2: crowd loading tests and vibration mitigation measures 16 28

Channel Tunnel Rail Link

Design of the Medway Viaduct 5 31

Chebyshev polynomials

An alternative mathematical framework for structural theory 23/24 45

Checking

Are structures being repaired unnecessarily? 1 22
Bouncing the checks 13 17
Competency in structural engineering design [Viewpoint] 15 16

Codes of practice

A new approach to specifying fire resistance periods 19 34
Competency in structural engineering design [Viewpoint] 15 16
Fire safety of concrete structures [Technical note] 6 22
Flexure and shear in reinforced concrete members [Technical note] 23/24 25
High alumina cement [Correspondence] 14 36
Should high-alumina cement be re-introduced into design codes? [Discussion] 10 38
Structural stainless steel design: a new approach 21 21

Collapse

Fire safety of concrete structures [Correspondence] 19 31
New approach to disproportionate collapse [Viewpoint] 23/24 14

Columns

New approach to disproportionate collapse [Viewpoint] 23/24 14
Safety in steelwork [Technical note] 15 25

Shear in reinforced concrete piles and circular columns	11	27
The strength of cast iron columns and the research work of Eaton Hodgkinson (1789-1861)	2	18
<u>Comalco Alumina Refinery, Queensland, Australia</u>		
Comalco alumina refinery - large project development in the central Queensland region of Australia	6	27
Comalco alumina refinery - large project development of the central Queensland region [Discussion]	17	43

Structural engineering modelling and analysis [Technical note]	3	28
Technology innovation in the construction industry [Viewpoint]	3	23
Using advanced engineering analysis in the design of concrete structures [Technical note]	3	20

Sports halls

The Optimum Sports Hall: a benchmark for the future	9	20
---	---	----

Stadia

Athens Olympics: the race for completion [Viewpoint]	9	14
Construction of the City of Manchester Stadium roof	2	24
Fitting an ellipse into a triangle	11	20

Stainless steel

Stainless steel in indoor swimming pool buildings [Technical note]	9	24
Structural stainless steel design: a new approach	21	21

Steel

A steel-framed hotel on the River Thames	9	27
Assessing perforation limits of steel section impacts on a reinforced concrete slabs [Technical note]	23/24	20
Design of steel framed buildings at risk from terrorist attack	22	31
Fatigue performance of laser-welded steel bridge decks	21	31
Long span steel pedestrian bridge at Singapore Changi Airport – part 1: prediction of vibration serviceability problems	16	21
Long span steel pedestrian bridge at Singapore Changi Airport – part 2: crowd loading tests and vibration mitigation measures	16	28
Safety in steelwork [Technical note]	15	25

Stone columns

Meeting substructure challenges [Technical note]	11	22
--	----	----

Strength

Design of steel framed buildings at risk from terrorist attack	22	31
Structural safety uncertainties in codes of practice for reinforced concrete [Correspondence]	15	35
The strength of cast iron columns and the research work of Eaton Hodgkinson (1789-1861)	2	18

Strengthening

Recent developments in the use of FRP anchors and masonry wall strengthening techniques [Research update]	18	20
---	----	----

Structural analysis

Demolition - assessing the risks and planning for safety	15	19
Membrane material behaviour: concepts, practice and developments	14	28
Structural engineering modelling and analysis [Technical note]	3	28
Tensile fabric structures: concepts, practice and developments	14	21

Structural behaviour

Understanding structural behaviour: a gap in the system [Viewpoint]	7	18
---	---	----

Structural engineering

Competency in structural engineering design [Viewpoint]	15	16
Relationship between structural engineering and architecture: the benefits [Education Trust: Essay Prize]	7	21
Sharing imagination: educating designers of the future (the Imagine Programme)	7	26
Structural engineering - a passport to travel [Presidential address]	19	22
Tectonics in structural engineering [Viewpoint]	16	16
The plight of research in structural engineering [Viewpoint]	7	16
The value of innovation	1	33
The value of innovation [Discussion]	8	34

Structural engineers

Are structural surveys proper engineering? [Discussion]	12	34
The changing roles of structural engineers in society: report of a strategic survey [Summary]	19	27

Structures

An alternative mathematical framework for structural theory	23/24	45
Are structures being repaired unnecessarily?	1	22
Bouncing the checks	13	17
Calibration of Eurocode1: actions on structures – part 1.2: actions on structures exposed to fire	19	38
Implementation of the structural Eurocodes	15	21
Management of structures: aspirations and reality [Management of Structures Study Group colloquium]	22	14
Structural design optimisation by evolution	13	29
Structures have relevance to biomedical research [Research update]	4	13

Subcontractors

Lessons for credit terms [Legal column]	4	10
---	---	----

Surveying

Are 'structural surveys' proper engineering?	1	27
Are structural surveys proper engineering? [Discussion]	12	34

Suspension bridges

Structural integrity monitoring by global positioning systems [Model Analysis Award]	4	25
--	---	----

Sustainability

Fit for the future [Report]	17	18
How can geotechnics address sustainability?	11	18
Kouga Cultural Centre: a lesson in sustainability	8	15
Sustainability into reality: responsible use of timber [Technical update]	17	24
The modern face of lime [Viewpoint]	8	13

Sustut River Bridge, British Columbia

The man who loves bridges [profile of David Harvey]	5	20
---	---	----

Swimming pools

Beijing Water Cube - the IT challenge	13	23
Stainless steel in indoor swimming pool buildings [Technical note]	9	24

Swiss Re Building, 30 St Mary Axe, London

Swiss Re sets the agenda for future high-rise buildings	10	14
---	----	----

T

Tall structures

HKIE/IstructE Joint Structural Division special awards 2004	20	16
---	----	----

Teaching

Sharing imagination: educating designers of the future (the Imagine Programme)	7	26
Understanding structural behaviour: a gap in the system [Viewpoint]	7	18

Tensile structures

Membrane material behaviour: concepts, practice and developments	14	28
Tensile fabric structures: concepts, practice and developments	14	21

Terminal 5, Heathrow Airport, London

Design and construction of Terminal 5 roof	18	25
Facing the T5 challenge	3	14

Terrorists

Design of steel framed buildings at risk from terrorist attack	22	31
<u>Ties</u>		
Building regs - approved doc A	20	37
New approach to disproportionate collapse [Viewpoint]	23/24	14
<u>Timber</u>		
21st Century timber engineering – the age of enlightenment for timber design: part 1: an introduction to timber	23/24	52
A cruck-frame building for the 21 st century	17	20
Conserving timber [Report]	17	17
Fit for the future [Report]	17	18
Preserving confidence [Technical note]	17	13
Round pole construction: a traditional approach for the future [Technical note]	17	21
Sustainability into reality: responsible use of timber [Technical update]	17	24
Timber bridge revival [Technical note]	10	18
The Tusenfryd Thundercoaster	17	30
