

<u>AUTHOR</u>	<u>TITLE</u>	<u>ISSUE</u>	<u>PAGE</u>
<b><u>A</u></b>			
Alexander, Stuart	Eurospeak!	22	15
Allsop, Andrew	The Spire of Dublin	16	20
Anumba, Chimay	Research opportunity for structural engineers	7	14
Arlekar, Jaswant N	Future directions for capacity design of welded beam-to-column connections in steel seismic moment resisting frames	13	36
Arnott, Kenneth	Shear wall analysis - new modelling, same answers [Technical note]	3	20
Ashraf, Mahmud	Structural stainless steel design [Project: young researcher]	21	28
Atkinson, Robin	Improved crack width calculation method to BS8007 for combined flexure and direct tension [Technical note]	10	18
<b><u>B</u></b>			
Banfi, Mike	Steel and composite structures [Research update]	21	30
Barratt, Nick	FE frame analysis aids design for fire safety	3	16
Beeby, A W	Solar effects on a partially buried reinforced concrete service reservoir	23/24	39
Blockley, David	Do ethics matter?	7	27
Bonnett, Danny	Wind turbine foundations - loading, dynamics and design	3	41
Boonpichetvong, M	Settlement damage of masonry buildings in soft-ground tunnelling	1	32
Bowsher, Ben	Changes to British Standards for reinforcing steels [Technical note]	23/24	18
Bradsell, C	Unreinforced solid dense concrete block walls constructed using thin joint technology	12	33
Brereton, Allan	Making the most of yourself: CPD reflects your merit	6	13
Brown, Stephen	Millennium and beyond	20	34
Buchanan, Robert	Structural platform solution for seismic arctic environments - Sakhalin II offshore facilities [Conference paper]	22	25
Burgam, Bassam	Economic fire resistance of steel structures	21	20
<b><u>C</u></b>			
Cameron, N J K	New design method to determine the membrane capacity of laterally restrained composite floor slabs in fire part 1: theory and method	19	28
	A new design method to determine the membrane capacity of laterally restrained composite floor slabs in fire part 2: validation	19	34
Canty, Les	Design aids for tubular vibrations and impact stresses [Technical note]	15	32

Caprani, Colin C	Headway modelling for traffic load assessment of short to medium span bridges	16	33
Carstairs, Neil	Gatwick air bridge	18	38
Chan, S L	Codified simulation-based design of steel structures in the new Hong Kong steel code	20	16
Chana, Pal	EN1990: Parametric studies on reliability levels and implications for design [Research update]	4	13
Chen, Y Y	Benchmarking of non-linear finite element analyses for reinforced concrete deep beams	3	29
Choy, K K	Hong Kong spotlight [introduction to Hong Kong special issue]	20	13
Clarke, Christopher S J	Structural platform solution for seismic arctic environments - Sakhalin II offshore facilities [Conference paper]	22	25
Coatsworth, Andrew M	Earthquake resistant nuclear structures - a regulatory view	14	30
Cooke, Gordon	Large sandwich panel fire resistance assessment [Technical note]	19	18
Costello, Fionnuala	Structural integrity research: the main achievements and challenges to come [Research update]	22	16
Croll, James G A	Some comments on the mechanics of thermal buckling	8	27

## **D**

Davies, J M	Eurocode 3 and the in-plane stability of portal frames	21	43
Deavy, Cormac P	The Spire of Dublin	16	20
De Boer, A	3D FEA of multi-beam box girder bridges: assessment of cross-sectional forces in joints	5	32
Dias, W P S	Conference paper: The significance of embedded energy for buildings in a tropical country	11	34
Dickson, Michael	An Institution for the future [IStructE Presidential Inaugural Address]	19	15p [supplement]
	Frei Otto's life's work: an inspiration for all	10	23
	Michael Dickson CBE: shaping the world [Profile]	18	28
Dignan, Marie	Fostering engineers of the future	7	20
Doran, David	From design to construction with assured quality and safety [Viewpoint]	15	15
Duckett, Will	Risk analysis and the acceptable probability of failure [Technical note]	15	25

## **E**

Edgell, G J	Masonry	9	27
Edmonson, V	Eurocode 3 and the in-plane stability of portal frames	21	43
Efthymiou, Michael	Structural platform solution for seismic arctic environments - Sakhalin II offshore facilities [Conference paper]	22	25
Elliott, Peter	Conservation: a practitioner's perspective	1	24
Erdevicki, Dejan	A structural system for bridge design [Technical note]	5	22
Esper, Philip	Major incident and disaster management	11	22
	Making public transport safer [Viewpoint]	15	12

## **F**

Farmer, Ian	'Tailor made' process for precasting panels [Site visit]	23/24	15
Feretzakis, Alexandros	Slab-column junctions with new detailing [Model analysis award]	14	24
Flaig, Katja D	The use of reliability analysis to aid bridge management	5	27
Fordyce, Mike	A dream realised [Report: President's year]	18	25
Forth, J P	Solar effects on a partially buried reinforced concrete service reservoir	23/24	39
Fried, A	Sustainable Technology Research Centre	12	14

	[Research update]		
	Unreinforced solid dense concrete block walls constructed using thin joint technology	12	33
Frissen, C M	3D FEA of multi-beam box girder bridges: assessment of cross-sectional forces in joints	5	32
Fryer, Simon	Design and construction of the Greenside Place Bridge Link, Edinburgh	21	39

## **G**

Gardner, Leroy	Structural steel oval hollow sections [Technical note]	21	32
Gohnert, M	Steel channel and hollow block floor slabs	10	30
Gold, Raymond	The rotating scaffolding in the dome of St Paul's Cathedral	23/24	46
Goodwill, I M	Solar effects on a partially buried reinforced concrete service reservoir	23/24	39
Grubb, P J	Developments in pre-fabricated systems in light steel and modular construction	6	28
Guarniere, Stuart	Form finding and branching structures	14	26
Gulvanessian, Haig	Design of concrete structures to EN1992 - common rules and design requirements for fire	23/24	33

## **H**

Harding, Geoff	Revised Part A of the Building Regulations [Technical update]	2	13
Harris, Richard	21st Century timber engineering - the age of enlightenment for timber design part 2: environmental credentials	2	23
Head, Peter	Built environment research: an agenda for the 21st Century [Viewpoint]	11	16
Healy, Paul	The Helix, Dublin City University	16	26
Hendriks, M A N	3D FEA of multi-beam box girder bridges: assessment of cross-sectional forces in joints	5	32
Hewson, Nigel R	Holmethorpe underbridge - a race against time	12	23
Heyman, Jacques	Theoretical analysis and real-world design [Viewpoint]	8	14
Hicks, Stephen	The vibration performance of steel-framed floors [Technical note]	21	22
Hill, John	Are you an FStructE wannabee? [Viewpoint]	18	15

## **I**

Ince, Robert	Making public transport safer [Viewpoint]	15	12
IStructE	IStructE Structural Awards 2005	22	14p [supplement]

## **J**

Ji, Tianjian	Frequency and velocity of people walking	3	36
Johnson, R P	Shear connection in beams that support composite slabs - BS5950 and EN1994-1-1	22	21
Jones, Bob	Fire safety: a partnership approach	19	22
Jones, Keith	The Spire of Dublin	16	20

## **K**

Kane, Noel	Irish masonry [Technical note]	16	16
Kaptijn, N	3D FEA of multi-beam box girder bridges: assessment of cross-sectional forces in joints	5	32
Keane, Bill	Major incident and disaster management	11	22
	Making public transport safer [Viewpoint]	15	12
Kennedy-Reid, I L	The influence of aggregate type on the shear resistance of reinforced concrete	23/24	27

Khabbazan, Mehdi M	Progressive collapse	12	28
King, C M	Eurocode 3 and the in-plane stability of portal frames	21	43
Knox, Ulrike	The rotating scaffolding in the dome of St Paul's Cathedral	23/24	46
Komakec, M J	Steel channel and hollow block floor slabs	10	30
Koo, Fred Y W	Application of the new foundation code in piling construction: contractor's perspectives	20	25
Kruger, Erhard	Improved crack width calculation method to BS8007 for combined flexure and direct tension [Technical note]	10	18

## L

Lam, Dennis	Developments in steel composite construction with precast hollowcore slabs [Research update]	13	13
Lark, Robert J	The use of reliability analysis to aid bridge management	5	27
Lawson, R M	Developments in pre-fabricated systems in light steel and modular construction	6	28
Lee, Fred Ka Wing	Development, trends and improvements of pedestrian bridges and covered link ways in Singapore	9	32
Lennon, Tom	Design of concrete structures to EN1992 - common rules and design requirements for fire	23/24	33
Leung, Albert W K	The new concrete and precast concrete codes: their development and essential features	20	30
Lewis, Guy	Multi-storey timber frame construction [Technical note]	17	26
Lilley, David M	Heritage structures: a new beginning? [Study group: heritage structures]	1	18
Lim, J B P	Eurocode 3 and the in-plane stability of portal frames	21	43
Lo, Stephen K L	The new Hong Kong wind code 2004	20	22
Lowe, A P	Solar effects on a partially buried reinforced concrete service reservoir	23/24	39

## M

Morley, C T	Benchmarking of non-linear finite element analyses for reinforced concrete deep beams	35	29
Marrocchino, E	Unreinforced solid dense concrete block walls constructed using thin joint technology	12	33
Martin, Andrew	The Metsovitikos bridge: designing a suspension bridge for the consequences of hazards [Technical note]	15	18
Matthews, Stuart	Large panel blocks: robustness assessment under accidental loading	8	13
May, I M	Benchmarking of non-linear finite element analyses for reinforced concrete deep beams	3	29
McCaughey, J D	Property damage from ground borne vibrations caused by sub-surface explosions [Viewpoint]	15	27
McGee, Paul	The Helix, Dublin City University	16	26
McRobie, Allan	The Bayesian view of extreme events [Technical note]	15	21
Milford, Ian	Climate change: a challenge for structural engineers [Viewpoint]	11	26
Ministro, Antonio	Structural steel oval hollow sections [Technical note]	21	32
Moran, John	Computer-assisted teaching of the design of steel structures	21	16
Morris, Kirsten	The design and use of passively safe street furniture	9	17
Murty, C V R	Future directions for capacity design of welded beam-to-column connections in steel seismic moment resisting frames	13	36

## **N**

Nethercot, D A	Effects of partial shear connection on the required and available rotations of semi-continuous composite beam systems	4	29
Neville, Adam	Background to minimising alkali-silica reaction in concrete [Viewpoint]	18	18
Ng, Choon Yeang	Development, trends and improvements of pedestrian bridges and covered link ways in Singapore	9	32
Ng, Terence C W	Application of the new foundation code in piling construction: contractor's perspectives	20	25
Nosewicz, H	3D FEA of multi-beam box girder bridges: assessment of cross-sectional forces in joints	5	32

## **O**

O'Brien, Eugene J	Headway modelling for traffic load assessment of short to medium span bridges	16	33
Ogden, R G	Developments in pre-fabricated systems in light steel and modular construction	6	28

## **P**

Pachi, Aikaterini	Frequency and velocity of people walking	3	36
Packman, Ron	The rolling bridge, Paddington Basin	2	15
Page, Arnold	More stress, less strain with Eurocodes [Technical note]	17	32
Pedreschi, R	Developments in pre-fabricated systems in light steel and modular construction	6	28
Plank, R J	Conference paper: Sustainable building construction for structural engineers	11	30
Pooliyadda, S P	Conference paper: The significance of embedded energy for buildings in a tropical country	11	34
Popo-Ola, S O	Developments in pre-fabricated systems in light steel and modular construction	6	28
Powell, Daniel	Gatwick air bridge	18	38
Price, Sam	Stone cantilevered staircases [James Sutherland History Lecture]	2	29
Pullen, A D	The influence of aggregate type on the shear resistance of reinforced concrete	23/24	27

## **Q**

Quinion, David	From design to construction with assured quality and safety [Viewpoint]	15	15
----------------	-------------------------------------------------------------------------	----	----

## **R**

Rathbone, A J	Eurocode 3 and the in-plane stability of portal frames	21	43
Reeves, Barry	Large panel blocks: robustness assessment under accidental loading	8	13
Regan, P E	The Influence of aggregate type on the shear resistance of reinforced concrete	23/24	27
Richards, Andrew W	Holmethorpe underbridge - a race against time	12	23
Roberts, John J	Unreinforced solid dense concrete block walls constructed using thin joint technology	12	33
Robertson, Leslie E	Rising to the challenge [Gold Medal Address]	6	20
Robinson, Clive	Structural building information modelling [Technical note]	13	23
Rogers, Helen	Stone cantilevered staircases [James Sutherland History Lecture]	2	29

Rots, J G	Settlement damage of masonry buildings in soft-ground tunnelling	1	32
Rutter, Guy	Cellular steel beam design	13	26
Ryan, Joe	Meeting the growing needs of Microsoft	16	14

## **S**

Samaras, Stephanos	Gatwick air bridge	18	38
Self, Martin	Serpentine pavilion	17	18
Shanks, J D	Experimental performance of mortice and tenon connections in green oak	17	40
Shanmuganathan, Sulojana	Chuetsu earthquake, Japan: bridge damage assessment	5	17
Shaw, Chris	Restoration of an historic wall	12	17

Shaw, Christopher	Structural platform solution for seismic arctic environments - Sakhalin II offshore facilities [Conference paper]	22	25
Smith, Andrew	Conservation: what should the structural engineer contribute? [Viewpoint]	1	15
Smith, D A	The influence of aggregate type on the shear resistance of reinforced concrete	23/24	27
Snell, Richard	Offshore structures	5	37
Soane, Alastair	Confidential Reporting On Structural Safety [CROSS]	10	10
Sobek, Werner	Glass structures	7	32
Spring, Allen	The new concrete and precast concrete codes: their development and essential features	20	30
Stansfield, Kathy	120 Year old design offers architecture of the future	3	14
	Effects of the Asian tsunami on structures	11	20
	Emirates stadium - Arsenal's new home takes shape	9	14
	Engineering for culture: pushing boundaries of design [Report]	18	22
	Meeting the housing numbers challenge with MMC [Modern Methods of Construction]	6	16
	Precast student flats at UWE, Bristol	23/24	16
	Sourcing quality timber supplies	17	22
	The role of design in engineering education	7	16
	Top IStructE exams scorer reveals secrets of his success [Interview]	10	14
	Wind tunnel takes off	22	18
	Young researchers urged to 'unlock the secrets of nature' [Young Researchers' Conference]	7	18
Stone, Jonathan	Serpentine pavilion	17	18
Sulman, David	Trends in timber certification	17	16
Svensson, Holger S	Modern composite bridges in Germany	4	21
Swann, Walter	Is your steel tough enough? Specifying steel quality to BS5950-1:2000 [Technical note]	21	24

## **I**

Tan, S C	Safti link bridge design and construction	8	20
Tee, Horng Hean	Developing WAP structural applications [Technical note]	3	25
Teh, H S	Safti link bridge design and construction	8	20
Thiemann, Richard	What future for fire engineering post 9/11? [Viewpoint]	19	16
Thomas, Rob	Jargon buster: a guide to acronyms [Guidance note]	10	16

## **U**

Usmani, A S	New design method to determine the membrane capacity of laterally restrained composite floor slabs in fire part 1: theory and method	19	28
	A new design method to determine the membrane capacity of laterally restrained composite floor slabs in fire part 2: validation	19	34
Uy, B	Effects of partial shear connection on the required and available rotations of semi-continuous composite beam systems	4	29

## **V**

Vary, Stephen	Jargon buster: a guide to acronyms [Guidance note]	10	16
Virdi, Kuldeep	Computer-assisted teaching of the design of steel structures	21	16

## W

Walker, P	Experimental performance of mortice and tenon connections in green oak	17	40
Watermeyer, Ron	South African standards for construction procurement	4	15
	Transparency issues in government procurement	2	18
Whitworth, Clare	Form finding and branching structures	14	26
Whyte, Jennifer	How engineers innovate and learn [Research update]	3	13
Williams, David	Sole practitioner groups for engineers [Viewpoint]	19	14
Wood, Jonathan G M	Paris airport terminal collapse: lessons for the future [findings of the French Transport Ministry]	5	13
Wright, Michael	Extreme engineering: facing the Antarctic challenge	11	13

## INDEX – VOLUME 83, 2005

## SUBJECT INDEX

<u>KEYWORDS</u>	<u>TITLE</u>	<u>ISSUE</u>	<u>PAGE</u>
<b>A</b>			
<b><u>Abbreviations</u></b>	Jargon buster: a guide to acronyms [Guidance note]	10	16
<b><u>Accidental Damage</u></b>	The Metsovitikos bridge: designing a suspension bridge for the consequences of hazards [Technical note]	15	18
<b><u>Accidental Loads</u></b>	Large panel blocks: robustness assessment under accidental loading	8	13
	Risk analysis and the acceptable probability of failure [Technical note]	15	25
<b><u>Acronyms</u></b>	Jargon buster: a guide to acronyms [Guidance note]	10	16
<b><u>Adhesives</u></b>	21st Century timber engineering - the age of enlightenment for timber design [Discussion]	6	36
<b><u>Aggregates</u></b>	Sustainable Technology Research Centre [Research update]	12	14
	The influence of aggregate type on the shear resistance of reinforced concrete	23/24	27
<b><u>Aircrete</u></b>	Sustainable Technology Research Centre [Research update]	12	14
<b><u>Airports</u></b>	Gatwick air bridge	18	38
	IStructE Structural Awards 2005	22	6 [supplement]
	Paris airport terminal collapse: lessons for the future [findings of the French Transport Ministry]	5	13
<b><u>Airside Centre, Zurich Airport, Switzerland</u></b>	IStructE Structural Awards 2005	22	6 [supplement]
<b><u>Alkalis</u></b>	Background to minimising alkali-silica reaction in concrete [Viewpoint]	18	18
<b><u>Aluminium</u></b>	The design and use of passively safe street furniture	9	17
<b><u>Analysis</u></b>	A new lease of life for Whitacre Bridge	13	16
	Analysis of Sarum College, Salisbury [Young engineer: prize project]	14	20
	Design and construction of the Greenside Place Bridge Link, Edinburgh	21	39
	Form finding and branching structures	14	26
<b><u>Antarctic</u></b>	Extreme engineering: facing the Antarctic challenge	11	13
<b><u>Appraising</u></b>	Earthquake resistant nuclear structures - a regulatory view	14	30
	Inspecting the Forth bridge	5	20
	Masonry	9	27
	Property damage from ground borne vibrations caused by sub-surface explosions [Viewpoint]	15	27
	The use of reliability analysis to aid bridge management	5	27

<b><u>Archaeology</u></b>	Conservation: a practitioner's perspective	1	24
<b><u>Arches</u></b>	Restorations and arching ambitions	14	22
<b><u>Arsenal Football Club, London</u></b>	Emirates stadium - Arsenal's new home takes shape	9	14
<b><u>Ashmead, Martin</u></b>	Back to basics [Profile: Martin Ashmead]	14	14
<b><u>ASR</u></b>	Background to minimising alkali-silica reaction in concrete [Viewpoint]	18	18
<b><u>Australia</u></b>	Registration and licensing of structural engineers [Report]	18	33
<b><u>Awards</u></b>	HKIE/IStructE Joint Structural Division Special Awards 2005	20	14
