

## INDEX – VOLUME 84, 2006 AUTHOR INDEX

AUTHOR	TITLE	ISSUE	PAGE
<b>A</b>			
Adams, John	Boost for engineers using Building Information Modelling	8	14
Ahearn, Alison	Hard graft in hard hats: developing practical skills	7	21
Alexander, Stuart J	Why does our concrete still crack and leak? [Conference paper]	23/24	40
Algaard, William H	A constrained layer damping system for composite floors	4	31
Algar, Sally	Steeling construction for unified design standards	2	13
Ali, Faris	Fire structural performances of concrete beams with hybrid (fibre-reinforced polymer-steel) reinforcements	19	33
Ali, Mohammad	Reinforcement corrosion and its remediation [Technical note]	23/24	28
<b>B</b>			
Bailey, C G	Development of a new long span composite floor system	21	32
Bailey, Phil	Compression struts bolster Foyle bridge, Northern Ireland	5	20
Bates, Paul	Taking the lid off The Sage – the UK's bright new Tyneside music venue	18	33
Beal, Alasdair N	Columns, sway frames and BS5950-1:2000	21	40
Beardmore, Denis	Getting the fire protection of cladding panels right	19	19
Bennett, Colin	Using the time equivalency method to evaluate fire risk [Technical note]	19	15
Berridge, Gareth	The stiffness contribution of mortice and tenon joints in traditional timber frames [Technical note]	17	20
Bryant, Paul	Fire engineering: the design team's new profession [Viewpoint]	19	13
Burgoyne, Chris	Why did Palau bridge collapse?	11	30
Burland, John	Interaction between structural and geotechnical engineers	8	29
Burr, Alan C	Tsunami research at Oregon State University [Research update]	13	16

Bussell, Michael	The use of structural models in design [report on IStructE History Study Group meeting of 19 April]	12	20
Butcher, Tony	Making the case for reusing foundations	23/24	22
<b>C</b>			
Camilleri, Denis	Seismic hazard awareness – a historical perspective	15	15
Carpenter, John	Designing for safe construction [Viewpoint]	10	17
Chaudhry, Saeed	Taking the lid off The Sage – the UK's bright new Tyneside music venue	18	33
Cheng, Y K	Focus on Hong Kong [Hong Kong Division special supplement]	20	18
Chiew, S P	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
Chung, K F	Fire resistance design of composite slabs in building structures from research to practice [Hong Kong Division special supplement]	20	30
Clark, B J	Analytical and experimental investigation of the behaviour of a rollover protective structure	1	29
Cleland, David J	Shear in reinforced concrete continuous beams [Northern Ireland Branch Supplement]	16	24
Cook, Mike	SAGE music centre, Gateshead – design and construction of the roof structure	10	23
Cooper, Martin	A new waterfront for Liverpool takes shape	21	21
Coulter, George	Baker's Court redevelopment [Northern Ireland Branch Supplement] Northern Ireland branch: small but active [Northern Ireland Branch Supplement]	16 16	16 14
Crewe, A J	Modelling of bridges subject to multiple support excitation [Technical note]	5	24
Cruise, Rachel	Effects of the production route on the behaviour of stainless steel structural members [Technical note]	22	18
Currie, P M	Development of a new long span composite floor system	21	32
<b>D</b>			
Dale, Gary	Submarine museum takes shape, complete with curves	13	18
Day, R A	Response to live loading of steel helical culverts with low cover	1	21
Desai, Satish	Structural engineering as a way of life [Viewpoint]	7	33
Dias, W P S	Tsunami - planning and design for disaster mitigation	11	25
Dickson, Michael	A President's view: the how and why of engineering A year of challenge [Report: President's year]	8 18	10 26
Ding, J M	Analysis of static wind effects on the membrane canopy roof of a large stadium	22	28
Dougill, J W	Human structure interaction during rhythmic bobbing	22	32
Durand, Chris	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
Dux, P F	Response to live loading of steel helical	1	21

## culverts with low cover

<b>F</b>			
Faber Maunsell	The Wesleyan Church of St Sidwell's, Exeter	2	19
Farmer, Ian	Birmingham 1 – the tallest Corefast development so far	18	14
	Sandwich plate system for new build and repair	5	22
	Within the sound of Bow Bells	22	25
Fegan, Paul	Baker's Court redevelopment [Northern Ireland Branch Supplement]	16	16
Ferguson Mann Acanthus	The Wesleyan Church of St Sidwell's, Exeter	2	19
Frayling, Christopher	From Brunel to Wallace and Gromit: the public image of the British engineer [Maitland lecture]	13	38
Fullwood, J	Extreme shade air temperatures to be used in structural design	18	41
<b>G</b>			
Gardner, Leroy	Effects of the production route on the behaviour of stainless steel structural members [Technical note]	22	18
Gilbert, Stephen G	Shear in reinforced concrete continuous beams [Northern Ireland Branch Supplement]	16	24
Goldsworthy, Ben	Eurocodes – an opportunity to review your spreadsheets?	13	24
Grubb, P J	Developments in light steel composites in floors and roofs	21	44
Guo, Zeqin	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32
<b>H</b>			
Hadden, David	The Scottish Parliament, Holyrood building	5	29
Hallum, Andrew J	Our role in conservation	6	29
Harris, Mark	Building for sustainability [Viewpoint]	9	15
Harris, P R	London's Victoria station – the historical development of the station and its approaches	12	24
Harris, Richard	Savill Building: a new landmark for Windsor Great Park	17	16
Harrison, R E	Human structure interaction during rhythmic bobbing	22	32
Harvey, Bill	Some problems with arch bridge assessment and potential solutions	3	45
Harvey, David	Bridges across the world [Profile: David Harvey]	18	20
	The value of the Institution – a new perspective [Presidential Address 2006]	19	45
He, Z J	Analysis of static wind effects on the membrane canopy roof of a large stadium	22	28
Heidkamp, Holger	Enlargement of the Marienplatz metro station – a complex tunnel project beneath Munich City Hall	3	41
Heywood, Martin	Building envelope developments at SCI [Research update]	12	18
Ho, Pui Ming	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32
Hodsdon, Tobias	Innovations in rammed earth construction, Western Australia	10	30
Hofstetter, Christian	Enlargement of the Marienplatz metro station – a complex tunnel	3	41

project beneath Munich City Hall

Holdsworth, Robin	Hard graft in hard hats: developing practical skills	7	21
Hong, Lim Peng	Singapore new supreme court building: marrying form and function [Singapore Division supplement]	14	17
Howson, Paul	Global analysis: back to the future [Research update]	3	18
Huerta, Santiago	Geometry and equilibrium: the gothic theory of structural design [James Sutherland History Lecture]	2	23
<b>I</b>			
IStructE	IStructE Structural Awards 2006: winners and commendations	21	[21p Suppl]
IStructE Examinations Panel	Exams – your questions answered [Exams update]	3	12
Ingham, Jason	Current seismic retrofit research in New Zealand [Research update]	11	20
Iyengar, H	Millennium park BP pedestrian crossing, Chicago, USA	13	33
<b>J</b>			
Jackson, Paul	Web crushing in EN1992	23/24	50
Jennings, Alan	Using disasters as a learning tool in higher education	15	18
Johnson, R P	Bridging gaps [Gold Medal Address 2006]	23/24	58
Johnstone, Patricia	The Scottish Parliament, Holyrood building	5	29
Jones, Tony	Implementation of Eurocode 2 within the UK [Technical note]	5	10
<b>K</b>			
Katz, Casimir	Enlargement of the Marienplatz metro station – a complex tunnel project beneath Munich City Hall	3	41
Kayvani, K	Capacities of steel columns with excessive crookedness	7	37
Kenward, Jo	Lift, launch and lower – replacing the Bishop's Bridge Road Bridge at Paddington Station	17	39
Keown, Paul	Shear in reinforced concrete continuous beams [Northern Ireland Branch Supplement]	16	24
Kerr, James Patrick	Reconstruction of cantilevered stone staircase at Christchurch, Belfast [Northern Ireland Branch Supplement]	16	20
Kotsovos, Michael D	Shortcomings of code methods for shear design of rc structures and the possible role of fibres	23/24	44
Kulkarni, A	An investigation on the response of circular ductile cantilevers subjected to air-blast [Singapore Division supplement]	14	22
<b>L</b>			
Langdon, N J	Geotechnical and environmental investigations [Viewpoint]	8	16
Lau, John	Flexural strength and ductility of concrete sections with inadequately anchored reinforcement [Research update]	10	15
Lawson, R M	Developments in light steel composites in floors and roofs	21	44
Lewis, David	The Scottish Parliament, Holyrood building	5	29
Lohaus, Ludger	Concreting of 50m high steel columns, Berlin central station [Technical note]	23/24	32

Lok, T S	An investigation on the response of circular ductile cantilevers subjected to air-blast [Singapore Division supplement]	14	22
Lyle, John	The Design and procurement of movable structures [Rowen Travel Award paper]	20	40
<b>M</b>			
Macaonghus, Francis	Professional development: a cost or a benefit? [Viewpoint]	7	23
Mackinnon, Pauline	Using disasters as a learning tool in higher education	15	18
MacLeod, Iain A	Taming the finite element tiger [Viewpoint]	3	16
MacQuiston, Stephen	Taking the lid off The Sage – the UK’s bright new Tyneside music venue	18	33
Maddalena, Stephen	Precast concrete’s double act	23/24	25
Mallikarachi, H M Y C	Tsunami – planning and design for disaster mitigation	11	25
Mann, Allan	2005 Kenneth Severn Award: how to attract young people into engineering	10	13
	Construction safety: an agenda for the profession [Evening meeting: ICE/ISE/SCOSS joint lecture 2005]	15	28
	The interpretation of computer analysis [Viewpoint]	7	29
Manson, M L	Belfast City Hospital new oncology centre – improving cancer care in Northern Ireland [Northern Ireland Branch Supplement]	16	30
Marko, Julius	Mitigating seismic response of shear wall structures using embedded dampers	1	25
Menzies, John	Structural robustness [Viewpoint]	2	16
Miller, Andrew	Integrating software with design packages	3	22
Miller, F R	Development of a new long span composite floor system	21	32
Monnickendam, Alan	Lift, launch and lower – replacing the Bishop’s Bridge Road Bridge at Paddington Station	17	39
Mottram, Toby	University research in West Midlands Counties branch	10	19
<b>N</b>			
Nadjai, Ali	Fire structural performances of concrete beams with hybrid (fibre-reinforced polymer-steel) reinforcements	19	33
Nicholl, R D	Belfast City Hospital new oncology centre – improving cancer care in Northern Ireland [Northern Ireland Branch Supplement]	16	30
Norman, James	Modelling of bridges subject to multiple support excitation [Technical note]	5	24
<b>O</b>			
O’Malley, Rory Ben	Size effect in frp reinforced concrete beams [Technical note: model analysis]	8	25
Oates, David	Delivering projects on time and on budget	3	32
Ochsendorf, John A	The masonry arch on spreading supports	2	29
Ogden, R G	Developments in light steel composites in floors and roofs	21	44
<b>P</b>			
Packman, Ron	Innovation in structural engineering	7	17
Palmer, Angus	SAGE music centre, Gateshead – design and construction of the roof structure	10	23

Pang, Paul T C	Fire engineering design and post fire assessment [Hong Kong Division special supplement]	20	23
Parkhouse, J G	Human structure interaction during rhythmic bobbing	22	32
Parsons, James	The new Swale Crossing	5	18
Pavlovic, Milija N	Shortcomings of code methods for shear design of rc structures and the possible role of fibres	23/24	44
Pedreschi, R	Developments in light steel composites in floors and roofs	21	44
Perera, N J	Analytical and experimental investigation of the behaviour of a rollover protective structure	1	29
	Mitigating seismic response of shear wall structures using embedded dampers	1	25
Perry, Bruce	An innovative solution for sea defence renewal	23/24	18
Persaud, Richard	Design and testing of a composite timber and concrete floor system	4	22
Petersen, Lasse	Concreting of 50m high steel columns, Berlin central station [Technical note]	23/24	32
Pocock, Graham	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
Pritchard, R W	Response to live loading of steel helical culverts with low cover	1	21
<b>R</b>			
Rathbone, Alan J	Design models of the 'real world'? [Technical note]	21	13
Roberts, John	A life of leisure [Gold Medal Address 2005]	12	33
Robinson, Clive	Connecting to BIM information with application program interfaces [Building Information Modelling]	13	27
Rockey, C	Millennium park BP pedestrian crossing, Chicago, USA	13	33
Rutter, Guy	Integrating software with design packages	3	22
<b>S</b>			
Sai, Lai Hoke	Singapore new supreme court building: marrying form and function [Singapore Division supplement]	14	17
Salim, Stephen W	Web crushing in EN 1992	23/24	50
Scantlebury, Richard	Why did Palau bridge collapse?	11	30
Shanks, J D	Lateral strength of green oak frames: physical testing and modelling	17	34
Shibata, Isona	The inter-relationship between structural engineering and architecture [Essay Prize]	7	25
Sinn, R	Millennium park BP pedestrian crossing, Chicago, USA	13	33
Sischka, Johan	SAGE music centre, Gateshead – design and construction of the roof structure	10	23
Sloan, David	Shear in reinforced concrete continuous beams [Northern Ireland Branch Supplement]	16	24
Smith, B W	Extreme shade air temperatures to be used in structural design	18	41

Soane, Alastair	CROSS reports on progress in feedback to improve safety	15	13
Song, Siak Keong	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32
Soon, Tan Kheng	Singapore new supreme court building: marrying form and function [Singapore Division supplement]	14	17
Stansfield, Kathy	A little bit of Eden, inspired by plant geometry [The Core building]	9	21
	After the earthquake: lessons from Pakistan	6	15
	Burj Dubai raises the tall building stakes	23/24	13
	Developing the precast business	23/24	24
	Footbridge design guide celebrates 'joy of engineering'	5	17
	New life for old structures [Report of an evening meeting]	11	14
	Value your skills, young researchers told at conference [Young Researchers' Conference]	7	15
Stross, Oliver	Working together to face the low carbon economy [Report: joint meeting]	9	17
	The inter-relationship between structural engineering and architecture [Essay Prize]	7	25
Symons, Digby	Design and testing of a composite timber and concrete floor system	4	22
<b>T</b>			
Talamona, Didier	Fire structural performances of concrete beams with hybrid (fibre-reinforced polymer-steel) reinforcements	19	33
Tasker, David	Poised between gravity and levity	19	39
Thambiratnam, David P	Analytical and experimental investigation of the behaviour of a rollover protective structure	1	29
	Mitigating seismic response of shear wall structures using embedded dampers	1	25
Thiemann, Richard	Living the high life: the structural challenge	8	22
Thomas, Caroline	TV tests: how safe is your home?	4	13
Thomas, David	What is killing UK construction workers?	22	13
Thorniley-Walker, Robert	Movement gauges: direct monitoring of foundations	6	25
Trahair, N S	Capacities of steel columns with excessive crookedness	7	37
Trant, Kate	Knowledge transfer: CABE's research programme [Research update]	18	17
Tweedie, Alan E	The Scottish Parliament, Holyrood building	5	29
<b>V</b>			
Van De Weijger, Hans	3D Interpolation method for intumescent coatings [Technical note]	19	22
Veale, John R	Madrid's Barajas Airport Terminal takes flight	22	15
Viriden, D W	Modelling of bridges subject to multiple support excitation [Technical note]	5	24
<b>W</b>			
Wagg, D J	Modelling of bridges subject to multiple support excitation [Technical note]	5	24
Walker, P	Lateral strength of green oak frames: physical testing and modelling	17	34

Wang, A J	Fire resistance design of composite slabs in building structures: from research to practice [Hong Kong Division special supplement]	20	30
Wang, C M	Singapore highlights [Singapore Division supplement]	14	16
Watermeyer, Ron	Poverty reduction responses to the Millennium Development Goals	9	27
Watson, Tim	Making it happen: strengthening the appeal of engineering to young people [Kenneth Severn Award]	10	12
Wee, Dan Yap Tian	Singapore new supreme court building: marrying form and function [Singapore Division supplement]	14	17
Wells, Matthew	Engineering with the products of the timber industry	17	26
Wiles, Peter	Reinforcement corrosion and its remediation [Technical note]	23/24	28
Wilkinson, Robin	The Scottish Parliament, Holyrood building	5	29
Willford, Michael	A constrained layer damping system for composite floors Comparing footfall-induced floor vibrations on different types of floor structure [Technical note]	4 8	31 19
Williams, John	Timber in historic buildings in the UK [Practice note]	17	10
Wong, K Y	Response to live loading of steel helical culverts with low cover	1	21
Wright, J R	Human structure interaction during rhythmic bobbing	22	32
<b>Y</b>			
Yeh, Harry	Tsunami research at Oregon State University [Research update]	13	16
Yeomans, David	The safety of historic structures	6	18
Yim, Solomon C	Tsunami research at Oregon State University [Research update]	13	16
Young, Peter	A constrained layer damping system for composite floors Comparing footfall-induced floor vibrations on different types of floor structure [Technical note]	4 8	31 19
Yu, Y	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
<b>Z</b>			
Zhou, Y	Analysis of static wind effects on the membrane canopy roof of a large stadium	22	28
Zils, J	Millennium park BP pedestrian crossing, Chicago, USA	13	33
Zintilis, George M	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14

## INDEX – VOLUME 84, 2006

### SUBJECT INDEX

Keywords	Title	Issue	Pages
<b>A</b>			
Access	Baker's Court redevelopment [Northern Ireland Branch Supplement]	16	16
	Designing for safe construction [Viewpoint]	10	17
Accidents	Structural robustness [Viewpoint]	2	16

	What is killing UK construction workers?	22	13
Accuracy	Movement gauges: direct monitoring of foundations	6	25
ACI 440	Size effect in frp reinforced concrete beams [Technical note: model analysis]	8	25
Acoustics	A new waterfront for Liverpool takes shape	21	21
	Taking the lid off The Sage – the UK's bright new Tyneside music venue	18	33
Air	Extreme shade air temperatures to be used in structural design	18	41
Air Tightness	Building envelope developments at SCI [Research update]	12	18
Airports	IStructE Structural Awards 2006: winners and commendations Madrid's Barajas Airport Terminal takes flight	21	11[Suppl]
		22	15
Allianz Arena, Munich, Germany	IStructE Structural Awards 2006: winners and commendations	21	17[Suppl]
Aluminium	An investigation on the response of circular ductile cantilevers subjected to air-blast [Singapore Division supplement]	14	22
Analysis	Columns, sway frames and BS5950-1:2000	21	40
	Design models of the 'real world'? [Technical note]	21	13
	The safety of historic structures	6	18
Anniversaries	From Brunel to Wallace and Gromit: the public image of the British engineer [Maitland lecture]	13	38
Antarctic	Delivering projects on time and on budget	3	32
Appraising	Fire engineering design and post fire assessment [Hong Kong Division special supplement]	20	23
	Masonry arch bridges [Discussion]	20	13
	Some problems with arch bridge assessment and potential solutions	3	45
	Timber in historic buildings in the UK [Practice note]	17	10
Arch Bridges	Masonry arch bridges [Discussion]	20	13
	Some problems with arch bridge assessment and potential solutions	3	45
Arches	The Masonry arch on spreading supports	2	29
Architecture	Knowledge transfer: CABE's research programme [Research update]	18	17
	The inter-relationship between structural engineering and architecture [Essay Prize]	7	25
Arenas	A new waterfront for Liverpool takes shape	21	21
Aston University, Birmingham	University research in West Midlands Counties branch	10	19
Astra Honda Motor new plant, West Java, Indonesia	IStructE Structural Awards 2006: winners and commendations	21	19[Suppl]
Auditoria	A new waterfront for Liverpool takes shape	21	21
Australia	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
	Innovations in rammed earth construction, Western Australia	10	30
Autodesk	Modelling New York's Freedom Tower	3	34

	Boost for engineers using Building Information Modelling	8	14
Awards	Focus on Hong Kong [Hong Kong Division special supplement]	20	18
	IStructE Structural Awards 2006: winners and commendations	21	[21p suppl]
	Joint Structural Division: Special Awards 2006 [Hong Kong Division special supplement]	20	20
	The Structural Engineer awards 2006	12	15
	Value your skills, young researchers told at conference [Young Researchers' Conference]	7	15
Axial Loads	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14
<b>B</b>			
Balconies	Reducing thermal energy loss through balcony structures [Practice note]	21	10
	Taking the lid off The Sage – the UK's bright new Tyneside music venue	18	33
	The Wesleyan Church of St Sidwell's, Exeter	2	19
Balustrades	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14
Barajas Airport, Madrid, Spain	IStructE Structural Awards 2006: winners and commendations	21	11[Suppl]
	Madrid's Barajas Airport Terminal takes flight	22	15
Barns	Experimental performance of tenon connections in green oak [Correspondence]	3	52
Barriers	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14
Bars	Size effect in frp reinforced concrete beams [Technical note: model analysis]	8	25
Basements	The Scottish Parliament, Holyrood building	5	29
	Why does our concrete still crack and leak? [Conference paper]	23/24	40
Battersea Power Station, London	Millennium and beyond [Discussion]	11	17
	New life for old structures [Report of an evening meeting]	11	14
Battersea Reach, London	Precast concrete's double act	23/24	25
Beams	Design and testing of a composite timber and concrete floor system	4	22
	Fire structural performances of concrete beams with hybrid (fibre-reinforced polymer-steel) reinforcements	19	33
	Integrating software with design packages	3	22
	Shear in reinforced concrete continuous beams [Northern Ireland Branch Supplement]	16	24
	Shortcomings of code methods for shear design of rc structures and the possible role of fibres	23/24	44
	Size effect in frp reinforced concrete beams [Technical note: model analysis]	8	25
Behaviour	Some problems with arch bridge assessment and potential solutions	3	45
Beijing National Swimming Centre, Beijing, China	Analysing Beijing's water cube	3	26
Belfast City Hospital Oncology Centre, Northern Ireland	Belfast City Hospital new oncology centre – improving cancer care in Northern Ireland [Northern Ireland Branch Supplement]	16	30
Belfast Co-operative Bakery,	Baker's Court redevelopment [Northern	16	16

Northern Ireland	Ireland Branch Supplement]		
Bell And Webster Concrete Ltd	Developing the precast business	23/24	24
Berlin Central Station, Germany	Concreting of 50m high steel columns, Berlin central station [Technical note]	23/24	32
Bi-steel	Birmingham 1 – the tallest Corefast development so far	18	14
Biographies	A life of leisure [Gold Medal Address 2005]	12	33
	Bridges across the world [Profile: David Harvey]	18	20
	Bridging gaps [Gold Medal Address 2006]	23/24	58
	Innovation in structural engineering	7	17
	The value of the Institution – a new perspective [Presidential address 2006]	19	45
Birmingham 1 Development, Birmingham	Birmingham 1 – the tallest Corefast development so far	18	14
Bishop's Bridge Road Bridge, Paddington, London	IStructE Structural Awards 2006: winners and commendations	21	10[Suppl]
	Lift, launch and lower - replacing the Bishop's Bridge Road Bridge at Paddington Station	17	39
Blackpool	An innovative solution for sea defence renewal	23/24	18
Blast Loading	An investigation on the response of circular ductile cantilevers subjected to air-blast [Singapore Division supplement]	14	22
Blast Resistance	The Scottish Parliament, Holyrood building	5	29
Bobbing	Human structure interaction during rhythmic bobbing	22	32
Bond Strength	Flexural strength and ductility of concrete sections with inadequately anchored reinforcement [Research update]	10	15
Boon Lay Extension, Singapore	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32
Bow Bells House, Bread Street, London	Within the sound of Bow Bells	22	25
Box Beams	Millennium park BP pedestrian crossing, Chicago, USA	13	33
BP Pedestrian Bridge, Chicago, USA	Millennium park BP pedestrian crossing, Chicago, USA	13	33
Brickwork	Masonry arch bridges [Discussion]	20	13
Bridge Decks	Lift, launch and lower – replacing the Bishop's Bridge Road Bridge at Paddington Station	17	39
	Sandwich plate system for new build and repair	5	22
Bridges	Bridges across the world [Profile: David Harvey]	18	20
	Delivering projects on time and on budget	3	32
	Extreme shade air temperatures to be used in structural design	18	41
	Headway modelling for traffic load assessment of short to medium span bridges [Correspondence]	3	51
	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
	London's Victoria station – the historical development of the station and its approaches	12	24
	Modelling of bridges subject to multiple support excitation [Technical note]	5	24
	New Eurocode 5: a boost for timber bridge construction?	5	15
	The value of the Institution – a new perspective [Presidential address 2006]	19	45

	The new Swale Crossing	5	18
British Airways London Eye, London	A Life of leisure [Gold Medal Address 2005]	12	33
British Museum, London	Millennium and beyond [Discussion]	11	17
	New life for old structures [Report of an evening meeting]	11	14
Brunel, I K	From Brunel to Wallace and Gromit: the public image of the British engineer [Maitland lecture]	13	38
BS 5950	Columns, sway frames and BS5950-1:2000	21	40
BS 8110	Implementation of Eurocode 2 within the UK [Technical note]	5	10
	Shear in reinforced concrete continuous beams [Northern Ireland Branch Supplement]	16	24
Building Regulations	Building envelope developments at SCI [Research update]	12	18
	Progressive collapse [Correspondence]	3	51
Buildings	After the earthquake: lessons from Pakistan	6	15
	Boost for engineers using Building Information Modelling	8	14
	Connecting to BIM information with application program interfaces [Building Information Modelling]	13	27
	Engineering with the products of the timber industry	17	26
	Fire engineering design and post fire assessment [Hong Kong Division special supplement]	20	23
	Fire engineering: the design team's new profession [Viewpoint]	19	13
	Knowledge transfer: CABE's research programme [Research update]	18	17
	Movement gauges: direct monitoring of foundations	6	25
	Progressive collapse [Correspondence]	3	51
	Seismic hazard awareness – a historical perspective	15	15
	Tsunami research at Oregon State University [Research update]	13	16
	Using the time equivalency method to evaluate fire risk [Technical note]	19	15
	Working together to face the low carbon economy [Report: joint meeting]	9	17
	Burj Dubai, United Arab Emirates	Burj Dubai raises the tall building stakes	23/24
Buttresses	Geometry and equilibrium: the gothic theory of structural design [James Sutherland History Lecture]	2	23
	The masonry arch on spreading supports	2	29
<b>C</b>			
Cable Stayed Bridges	IStructE Structural Awards 2006: winners and commendations	21	8&20 [suppl.]
CADS	Submarine museum takes shape, complete with curves	13	18
Cafes	IStructE Structural Awards 2006: winners and commendations	21	15[Suppl]
Calabria, Italy	Seismic hazard awareness – a historical perspective	15	15
Calculations	Eurocodes – an opportunity to review your spreadsheets?	13	24
	Taming the finite element tiger [Viewpoint]	3	16
Calliope South Wharf Access Jetty, Devonport Naval Base, Auckland, New Zealand	Reinforcement corrosion and its remediation [Technical note]	23/24	28
Canada	Bridges across the world [Profile: David Harvey]	18	20
	The value of the Institution - a new perspective	19	45

[Presidential Address 2006]

Canal Bridges	Lift, launch and lower – replacing the Bishop’s Bridge Road Bridge at Paddington Station	17	39
Canopies	Analysis of static wind effects on the membrane canopy roof of a large stadium	22	28
Cantilever Construction	Millennium park BP pedestrian crossing, Chicago, USA	13	33
	Reconstruction of cantilevered stone staircase at Christchurch, Belfast [Northern Ireland Branch Supplement]	16	20
	Taking the lid off The Sage – the UK’s bright new Tyneside music venue	18	33
Cantilevers	An Investigation on the response of circular ductile cantilevers subjected to air-blast [Singapore Division supplement]	14	22
	Why did Palau bridge collapse?	11	30
Capella Da Nossa Senora Do Monte, Goa, India	The masonry arch on spreading supports	2	29
Car Parks	Baker’s Court redevelopment [Northern Ireland Branch Supplement]	16	16
	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
	Why does our concrete still crack and leak? [Conference paper]	23/24	40
Carbon Dioxide	Working together to face the low carbon economy [Report: joint meeting]	9	17
Case Studies	Delivering projects on time and on budget	3	32
	Engineering with the products of the timber industry	17	26
	Fire engineering design and post fire assessment [Hong Kong Division special supplement]	20	23
	Integrating software with design packages	3	22
	Interaction between structural and geotechnical engineers	8	29
	Knowledge transfer: CABE’s research programme [Research update]	18	17
	Movement gauges: direct monitoring of foundations	6	25
	New Eurocode 5: a boost for timber bridge construction?	5	15
	Reinforcement corrosion and its remediation [Technical note]	23/24	28
	The masonry arch on spreading supports	2	29
Cast Iron	Tsunami – planning and design for disaster mitigation	11	25
	Why does our concrete still crack and leak? [Conference paper]	23/24	40
	London’s Victoria station – the historical development of the station and its approaches	12	24
Castles	Movement gauges: direct monitoring of foundations	6	25
Cathedrals	Geometry and equilibrium: the gothic theory of structural design [James Sutherland History Lecture]	2	23
	Geometry and equilibrium: the Gothic theory of structural design (James Sutherland History Lecture) [Discussion]	17	46
Cathodic Protection	Reinforcement corrosion and its remediation [Technical note]	23/24	28
CDM	Designing for safe construction [Correspondence]	19	27
Chimneys	Millennium and beyond [Discussion]	11	17

China	Focus on Hong Kong [Hong Kong Division special supplement]	20	18
	Joint Structural Division: Special Awards 2006 [Hong Kong Division special supplement]	20	20
Choi Hung Park And Ride Development, Hong Kong	Joint Structural Division: Special Awards 2006 [Hong Kong Division special supplement]	20	20
Christchurch, Belfast, Northern Ireland	Reconstruction of cantilevered stone staircase at Christchurch, Belfast [Northern Ireland Branch Supplement]	16	20
Churches	Geometry and equilibrium: the gothic theory of structural design [James Sutherland History Lecture]	2	23
	Reconstruction of cantilevered stone staircase at Christchurch, Belfast [Northern Ireland Branch Supplement]	16	20
	The masonry arch on spreading supports	2	29
	The Wesleyan Church of St Sidwell's, Exeter	2	19
Cinemas	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
Civic Tower, Pavia, Italy	Masonry arch bridges [Discussion]	20	13
Civil Engineering	Using disasters as a learning tool in higher education	15	18
Cladding	Building envelope developments at SCI [Research update]	12	18
	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
	Getting the fire protection of cladding panels right	19	19
	Millennium park BP pedestrian crossing, Chicago, USA	13	33
	SAGE music centre, Gateshead – design and construction of the roof structure	10	23
Climate	Working together to face the low carbon economy [Report: joint meeting]	9	17
Coastal Defences	An innovative solution for sea defence renewal	23/24	18
Codes Of Practice	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14
	Bridging gaps [Gold Medal Address 2006]	23/24	58
	Fire engineering design and post fire assessment [Hong Kong Division special supplement]	20	23
	Why does our concrete still crack and leak? [Conference paper]	23/24	40
Collapse	Lateral strength of green oak frames: physical testing and modelling	17	34
	Masonry arch bridges [Discussion]	20	13
	The masonry arch on spreading supports	2	29
	Why did Palau bridge collapse?	11	30
Colonnade	Precast concrete's double act	23/24	25
Columns	Capacities of steel columns with excessive crookedness	7	37
	Capacities of steel columns with excessive crookedness [Correspondence]	19	28
	Columns, sway frames and BS 5950-1:2000	21	40
	Concreting of 50m high steel columns, Berlin Central Station [Technical note]	23/24	32
	Interaction between structural and geotechnical engineers	8	29
Commission For Architecture And The Built Environment (CABE)	Knowledge transfer: CABE's research programme [Research update]	18	17
Companies	Developing the precast business	23/24	24

Competitions	Taiwan earthquake engineering event	2	8
	Teambuild challenges skills of the under 30s [Young engineers]	2	10
Components	Developing the precast business	23/24	24
Composite Bridges	Coutts Crossing bridge deck	1	18
Composite Construction	A constrained layer damping system for composite floors	4	31
	Birmingham 1– the tallest Corefast development so far	18	14
	Bridging gaps [Gold Medal Address 2006]	23/24	58
	Comparing footfall induced floor vibrations on different types of floor structure [Correspondence]	10	36
	Concreting of 50m high steel columns, Berlin central station [Technical note]	23/24	32
	Design and testing of a composite timber and concrete floor system	4	22
	Development of a new long span composite floor system	21	32
	Developments in light steel composites in floors and roofs	21	44
	Fire resistance design of composite slabs in building structures: from research to practice [Hong Kong Division special supplement]	20	30
	Fire structural performances of concrete beams with hybrid (fibre-reinforced polymer-steel) reinforcements	19	33
	Getting the fire protection of cladding panels right	19	19
	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
Compression	Compression struts bolster Foyle bridge, Northern Ireland	5	20
Computers	Taming the finite element tiger [Viewpoint]	3	16
	The interpretation of computer analysis [Viewpoint]	7	29
Concert Halls	SAGE music centre, Gateshead – design and construction of the roof structure	10	23
	Taking the lid off The Sage – the UK’s bright new Tyneside music venue	18	33
Concrete	Baker’s Court redevelopment [Northern Ireland Branch Supplement]	16	16
	Belfast City Hospital new oncology centre – improving cancer care in Northern Ireland [Northern Ireland Branch Supplement]	16	30
	Birmingham 1 – the tallest Corefast development so far	18	14
	Burj Dubai raises the tall building stakes	23/24	13
	Comparing footfall induced floor vibrations on different types of floor structure [Correspondence]	10	36
	Comparing footfall-induced floor vibrations on different types of floor structure [Technical note]	8	19
	Current seismic retrofit research in New Zealand [Research update]	11	20
	Development of a new long span composite floor system	21	32
	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
	Implementation of Eurocode 2 within the UK [Technical note]	5	10
	Madrid’s Barajas Airport Terminal takes flight	22	15
	Taking the lid off The Sage – the UK’s bright new Tyneside music venue	18	33
	University research in West Midlands Counties branch	10	19
Web crushing in EN 1992	23/24	50	
Conference Centres	A new waterfront for Liverpool takes shape	21	21
	Convention Centre, Malaysia	3	36
Conferences	Making the case for reusing foundations	23/24	22
	Value your skills, young researchers told at conference [Young Researchers’ Conference]	7	15

Confidential Reporting On Structural Safety (CROSS)	CROSS reports on progress in feedback to improve safety	15	13
Connections	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
	Design models of the 'real world'? [Technical note]	21	13
	Designing for safe construction [Viewpoint]	10	17
	Lateral strength of green oak frames: physical testing and modelling	17	34
Construction Industry	Building for sustainability [Viewpoint]	9	15
	Construction safety: an agenda for the profession [Evening meeting: ICE/ISE/SCOSS joint lecture 2005]	15	28
	What is killing UK construction workers?	22	13
	Young members in the spotlight [Lancashire & Cheshire Branch annual Young Members Papers Evening]	22	22
Construction Methods	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32
Construction Sites	A President's view: the how and why of engineering	8	10
Construction Work	A new waterfront for Liverpool takes shape	21	21
	Birmingham 1 – the tallest Corefast development so far	18	14
	Burj Dubai raises the tall building stakes	23/24	13
	Convention Centre, Malaysia	3	36
	Designing for safe construction [Correspondence]	19	27

	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
	Hard graft in hard hats: developing practical skills	7	21
	Innovations in rammed earth construction, Western Australia	10	30
SAGE music centre, Gateshead – design and construction of the roof structure	10	23	
The Constructionarium Scheme	Hard graft in hard hats: developing practical skills	7	21
Contaminated Land	Geotechnical and environmental investigations [Viewpoint]	8	16
	Managing risk with piled raft foundation system [Practice note]	15	24
Contractors	Designing for safe construction [Correspondence]	19	27
	Designing for safe construction [Viewpoint]	10	17
Converting	Making extraordinary structures buildable	3	30
	Young members in the spotlight [Lancashire & Cheshire Branch annual Young Members Papers Evening]	22	22
Cooper River Replacement Bridge, Charleston, USA	Delivering projects on time and on budget	3	32
Cooperation	Steeling construction for unified design standards	2	13
	The inter-relationship between structural engineering and architecture [Essay Prize]	7	25
Corefast	Birmingham 1 – the tallest Corefast development so far	18	14
	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
Corrosion	Reinforcement corrosion and its remediation [Technical note]	23/24	28
	The Wesleyan Church of St Sidwell's, Exeter	2	19
Coutts Crossing, New South Wales, Australia	Coutts Crossing bridge deck	1	18

Coventry University	University research in West Midlands Counties branch	10	19
CPD	New e-learning programme about using wood [Wood For Good programme]	17	24
	Professional development: a cost or a benefit? [Viewpoint]	7	23
Cracking	Interaction between structural and geotechnical engineers	8	29
	Masonry arch bridges [Discussion]	20	13
	Movement gauges: direct monitoring of foundations	6	25
	Why does our concrete still crack and leak? [Conference paper]	23/24	40
Creep	Why did Palau bridge collapse?	11	30
Crowds	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14
	Human structure interaction during rhythmic bobbing	22	32
Crushing	Web crushing in EN 1992	23/24	50
Culverts	Response to live loading of steel helical culverts with low cover	1	21
Cutty Sark, Greenwich, London	New life for old structures [Report of an evening meeting]	11	14
<b>D</b>			
Damage	After the earthquake: lessons from Pakistan	6	15
	Interaction between structural and geotechnical engineers	8	29
	Structural robustness [Viewpoint]	2	16
	TV tests: how safe is your home?	4	13
Damping	A constrained layer damping system for composite floors	4	31
	Comparing footfall induced floor vibrations on different types of floor structure [Correspondence]	10	36
	Gatwick air bridge [Discussion]	8	38
	Mitigating seismic response of shear wall structures using embedded dampers	1	25
Deaths	What is killing UK construction workers?	22	13
Decay	Timber in historic buildings in the UK [Practice note]	17	10
Derrington Construction Award	The Structural Engineer awards 2006	12	15
Design	Analysing Beijing's water cube	3	26
	Construction safety: an agenda for the profession [Evening meeting: ICE/ISE/SCOSS joint lecture 2005]	15	28
	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32

IStructE Structural Awards 2006: winners and commendations	The design and procurement of movable structures [Rowen Travel Award paper]	21	17&19[Suppl]
		20	40
Stainless Steel	Effects of the production route on the behaviour of stainless steel structural members [Technical note]	22	18
	Millennium park BP pedestrian crossing, Chicago, USA	13	33
	SAGE music centre, Gateshead – design and construction of the roof structure	10	23
Stairs	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14
	Reconstruction of cantilevered stone staircase at Christchurch, Belfast [Northern Ireland Branch Supplement]	16	20
Standing Committee On Structural Safety (SCOSS)	Construction safety: an agenda for the profession [Evening meeting: ICE/ISE/SCOSS joint lecture 2005]	15	28
Star City, Sydney, Australia	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
Statistics	What is killing UK construction workers?	22	13
Steel	3D Interpolation method for intumescent coatings [Technical note]	19	22
	A new waterfront for Liverpool takes shape	21	21
	Analytical and experimental investigation of the behaviour of a rollover protective structure	1	29
	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
	Birmingham 1 – the tallest Corefast development so far	18	14
	Building a busway in Brisbane	1	13
	Building envelope developments at SCI [Research update]	12	18
	Capacities of steel columns with excessive crookedness	7	37
	Capacities of steel columns with excessive crookedness [Correspondence]	19	28
	Columns, sway frames and BS 5950-1:2000	21	40
	Comparing footfall induced floor vibrations on different types of floor structure [Correspondence]	10	36
	Comparing footfall-induced floor vibrations on different types of floor structure [Technical note]	8	19
	Compression struts bolster Foyle bridge, Northern Ireland	5	20
	Concreting of 50m high steel columns, Berlin central station [Technical note]	23/24	32
	Current seismic retrofit research in New Zealand [Research update]	11	20
	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32
	Design models of the ‘real world’? [Technical note]	21	13
	Designing for safe construction [Correspondence]	19	27
	Designing for safe construction [Viewpoint]	10	17
	Development of a new long span composite floor system	21	32
	Developments in light steel composites in floors and roofs	21	44
	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
	Eurocodes – an opportunity to review your spreadsheets?	13	24
	Fire structural performances of concrete beams with hybrid (fibre-reinforced polymer-steel) reinforcements	19	33
	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
	Integrating software with design packages	3	22
	Madrid’s Barajas Airport Terminal takes flight	22	15
	Millennium park BP pedestrian crossing, Chicago, USA	13	33
	Newport City Footbridge: an inspiring connection	21	18
	SAGE music centre, Gateshead – design and construction of the roof structure	10	23

	Singapore new supreme court building: marrying form and function [Singapore Division supplement]	14	17
	Steeling construction for unified design standards	2	13
	Submarine museum takes shape, complete with curves	13	18
	Taking the lid off The Sage – the UK's bright new Tyneside music venue	18	33
	The interpretation of computer analysis [Viewpoint]	7	29
	The vibration performance of steel-framed floors [Correspondence]	10	36
	The new Swale Crossing	5	18
	University research in West Midlands Counties branch	10	19
Steel Plates	Sandwich plate system for new build and repair	5	22
Stiffening	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
Stone	Masonry arch bridges [Discussion]	20	13
	Reconstruction of cantilevered stone staircase at Christchurch, Belfast [Northern Ireland Branch Supplement]	16	20
Straightening	Capacities of steel columns with excessive crookedness	7	37
111 Strand, London	Precast concrete's double act	23/24	25
Strand7	Analysing Beijing's water cube	3	26
Strength	Capacities of steel columns with excessive crookedness	7	37
	Capacities of steel columns with excessive crookedness [Correspondence]	19	28
	Effects of the production route on the behaviour of stainless steel structural members [Technical note]	22	18
	Lateral strength of green oak frames: physical testing and modelling	17	34
	Timber in historic buildings in the UK [Practice note]	17	10
Strengthening	Compression struts bolster Foyle bridge, Northern Ireland	5	20
	Sandwich plate system for new build and repair	5	22
Stress	The Interpretation of computer analysis [Viewpoint]	7	29
	Web crushing in EN 1992	23/24	50
Stressed Skin	Engineering with the products of the timber industry	17	26
Structural Analysis	Global analysis: back to the future [Research update]	3	18
	Taming the finite element tiger [Viewpoint]	3	16
Structural Behaviour	The use of structural models in design [report on IStructE History Study Group meeting of 19 April]	12	20
The Structural Engineer	The Structural Engineer awards 2006	12	15
Structural Engineering	Focus on Hong Kong [Hong Kong Division special supplement]	20	18
	Innovation in structural engineering	7	17
	IStructE Structural Awards 2006: winners and commendations	21	[21p Suppl]
	The inter-relationship between structural engineering and architecture [Essay Prize]	7	25
	The value of the Institution – a new perspective [Presidential address 2006]	19	45
Structural Engineers	Interaction between structural and geotechnical engineers	8	29
	Structural engineering as a way of life [Viewpoint]	7	33
Structural Members	Design models of the 'real world'? [Technical note]	21	13
	Effects of the production route on the behaviour of stainless steel structural members [Technical note]	22	18
Structures	CROSS reports on progress in feedback to improve safety	15	13
	Glass structures [Discussion]	2	36

	Human structure interaction during rhythmic bobbing	22	32
	Poised between gravity and levity	19	39
	Structural robustness [Viewpoint]	2	16
	The interpretation of computer analysis [Viewpoint]	7	29
	The use of structural models in design [report on IStructE History Study Group meeting of 19 April]	12	20
	Tsunami – planning and design for disaster mitigation	11	25
Struts	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
	Compression struts bolster Foyle bridge, Northern Ireland	5	20
Strux 90/40	An innovative solution for sea defence renewal	23/24	18
Students	Hard graft in hard hats: developing practical skills	7	21
	Taiwan earthquake engineering event	2	8
	Using disasters as a learning tool in higher education	15	18
Submarines	Submarine museum takes shape, complete with curves	13	18
Subsidence	Managing risk with piled raft foundation system [Practice note]	15	24
Sungai Prai Bridge, Penang, Malaysia	IStructE Structural Awards 2006: winners and commendations	21	8[Suppl]
Supreme Court Building, Singapore	Singapore new supreme court building: marrying form and function [Singapore Division supplement]	14	17
Surveying	Our role in conservation	6	29
Surveys	The IStructE Library: here to help you	4	15
Sustainability	A little bit of Eden, inspired by plant geometry [The Core building]	9	21
	Bridging gaps [Gold Medal Address 2006]	23/24	58
	Building for sustainability [Viewpoint]	9	15
	The value of the Institution – a new perspective [Presidential address 2006]	19	45
	Working together to face the low carbon economy [Report: joint meeting]	9	17
Swale Crossing, Kent	The new Swale Crossing	5	18
Swimming Pools	Analysing Beijing's water cube	3	26
Synthetic Fibre Reinforced Concrete	An innovative solution for sea defence renewal	23/24	18
<b>T</b>			
Teaching	Hard graft in hard hats: developing practical skills	7	21
Teams	Designing for safe construction [Viewpoint]	10	17
Techrete	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
TEDDS	Eurocodes – an opportunity to review your spreadsheets?	13	24
Tekdek System	Development of a new long span composite floor system	21	32
Temperatures	Extreme shade air temperatures to be used in structural design	18	41
Temporary Works	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
Tenon	The stiffness contribution of mortice and tenon joints in traditional timber frames [Technical note]	17	20
Tension Structures	University research in West Midlands Counties branch	10	19

Terminal Buildings	IStructE Structural Awards 2006: winners and commendations	21	11[Suppl]
	Madrid's Barajas Airport Terminal takes flight	22	15
Testing	A constrained layer damping system for composite floors	4	31
	An investigation on the response of circular ductile cantilevers subjected to air-blast [Singapore Division supplement]	14	22
	Analysis of static wind effects on the membrane canopy roof of a large stadium	22	28
	Analytical and experimental investigation of the behaviour of a rollover protective structure	1	29
	Axial loading on handrails of stair balustrades in buildings [Technical note]	2	14
	Burj Dubai raises the tall building stakes	23/24	13
	Design and testing of a composite timber and concrete floor system	4	22
	Development of a new long span composite floor system	21	32
	Developments in light steel composites in floors and roofs	21	44
	Effects of the production route on the behaviour of stainless steel structural members [Technical note]	22	18
	Human structure interaction during rhythmic bobbing	22	32
	Lateral strength of green oak frames: physical testing and modelling	17	34
	Response to live loading of steel helical culverts with low cover	1	21
	Shortcomings of code methods for shear design of rc structures and the possible role of fibres	23/24	44
	Size effect in frp reinforced concrete beams [Technical note: model analysis]	8	25
	Some problems with arch bridge assessment and potential solutions	3	45
	TV tests: how safe is your home?	4	13
	Web crushing in EN1992	23/24	50
	Theme Parks	A life of leisure [Gold Medal Address 2005]	12
Thermal Insulation	Reducing thermal energy loss through balcony structures [Practice note]	21	10
Three Pacific Place, Hong Kong	Joint Structural Division: Special Awards 2006 [Hong Kong Division special supplement]	20	20
Ties	Progressive collapse [Correspondence]	3	51
Timber	A life of leisure [Gold Medal Address 2005]	12	33
	A little bit of Eden, inspired by plant geometry [The Core building]	9	21
	Developments in light steel composites in floors and roofs	21	44
	Engineering with the products of the timber industry	17	26
	Experimental performance of tenon connections in green oak [Correspondence]	3	52
	Lateral strength of green oak frames: physical testing and modelling	17	34
	New Eurocode 5: a boost for timber bridge construction?	5	15
	New e-learning programme about using wood [Wood For Good programme]	17	24
	Our role in conservation	6	29
	Savill Building: a new landmark for Windsor Great Park	17	16
	The stiffness contribution of mortice and tenon joints in traditional timber frames [Technical note]	17	20
	Timber in historic buildings in the UK [Practice note]	17	10
Towers	Burj Dubai raises the tall building stakes	23/24	13
	IStructE Structural Awards 2006: winners and commendations	21	12&17[Suppl]
	Joint Structural Division: Special Awards 2006 [Hong Kong Division special supplement]	20	20
	Masonry arch bridges [Discussion]	20	13

	Modelling New York's Freedom Tower	3	34
Traffic Loads	Headway modelling for traffic load assessment of short to medium span bridges [Correspondence]	3	51
Trafford Centre, Manchester	Precast concrete's double act	23/24	25
Training	Focus on Hong Kong [Hong Kong Division special supplement]	20	18
Transport	Joint Structural Division: Special Awards 2006 [Hong Kong Division special supplement]	20	20
Trusses	Gwangmyeong velodrome: roof erection analysis	3	28
	Millennium park BP pedestrian crossing, Chicago, USA	13	33
Tsunamis	Tsunami – planning and design for disaster mitigation	11	25
	Tsunami research at Oregon State University [Research update]	13	16
Tubes	Compression struts bolster Foyle bridge, Northern Ireland	5	20
Tullibardine Bridge, Perth, Australia	New Eurocode 5: a boost for timber bridge construction?	5	15
Tunnelling	Enlargement of the Marienplatz metro station – a complex tunnel project beneath Munich City Hall	3	41
<b>U</b>			
Underground Car Parks	Baker's Court redevelopment [Northern Ireland Branch Supplement]	16	16
Underground Railways	Enlargement of the Marienplatz metro station – a complex tunnel project beneath Munich City Hall	3	41
United Kingdom	Extreme shade air temperatures to be used in structural design	18	41
	Implementation of Eurocode 2 within the UK [Technical note]	5	10
	Innovations in rammed earth construction, Western Australia	10	30
	Living the high life: the structural challenge	8	22
	New Eurocode 5: a boost for timber bridge construction?	5	15
	What is killing UK construction workers?	22	13
	Young members in the spotlight [Lancashire & Cheshire Branch annual Young Members Papers Evening]	22	22
Universities	IStructE Structural Awards 2006: winners and commendations	21	14[Suppl]
	Spotlight on research in Queensland [Research update]	1	14
	University research in West Midlands Counties branch	10	19
University Of Birmingham	University research in West Midlands Counties branch	10	19
University Of Manchester	Young members in the spotlight [Lancashire & Cheshire Branch annual Young Members Papers Evening]	22	22
University Of Warwick	University research in West Midlands Counties branch	10	19
USA	High strength steel use in Australia, Japan and the US [Rowen Travel Award paper]	21	27
	The design and procurement of movable structures [Rowen Travel Award paper]	20	40
<b>V</b>			
Vaults	Geometry and equilibrium: the Gothic theory of structural design (James Sutherland History Lecture) [Discussion]	17	46
	Geometry and equilibrium: the gothic theory of structural design [James Sutherland History Lecture]	2	23
Vehicles	Analytical and experimental investigation of the behaviour of a rollover protective structure	1	29
	Response to live loading of steel helical culverts with low cover	1	21

Velodromes	Gwangmyeong velodrome: roof erection analysis	3	28
Ventilation	Taking the lid off The Sage – the UK’s bright new Tyneside music venue	18	33
	Using the time equivalency method to evaluate fire risk [Technical note]	19	15
Viaducts	IStructE Structural Awards 2006: winners and commendations	21	20[Suppl]
	The new Swale Crossing	5	18
Vibration	A constrained layer damping system for composite floors	4	31
	Comparing footfall induced floor vibrations on different types of floor structure [Correspondence]	10	36
	Comparing footfall-induced floor vibrations on different types of floor structure [Technical note]	8	19
	Design challenges: station steel roof for Boon Lay Extension in Singapore [Singapore Division supplement]	14	32
	Mitigating seismic response of shear wall structures using embedded dampers	1	25
	Modelling of bridges subject to multiple support excitation [Technical note]	5	24
	The vibration performance of steel-framed floors [Correspondence]	10	36
	Young members in the spotlight [Lancashire & Cheshire Branch annual Young Members Papers Evening]	22	22
Victoria Station, London	London’s Victoria station – the historical development of the station and its approaches	12	24
Visitor Centres	IStructE Structural Awards 2006: winners and commendations	21	21[Suppl]
	Savill Building: a new landmark for Windsor Great Park	17	16
<b>W</b>			
Walers	Behaviour of strut-waler connections with different stiffening details [Singapore Division supplement]	14	28
Walking	Comparing footfall induced floor vibrations on different types of floor structure [Correspondence]	10	36
	Comparing footfall-induced floor vibrations on different types of floor structure [Technical note]	8	19
Waste Materials	Building for sustainability [Viewpoint]	9	15
Water	TV tests: how safe is your home?	4	13
Waters’ Edge Country Park Visitor And Business Centre, Barton-upon-Humber, Lincolnshire	IStructE Structural Awards 2006: winners and commendations	21	21[Suppl]
Waves	Tsunami – planning and design for disaster mitigation	11	25
	Tsunami research at Oregon State University [Research update]	13	16
Webs	Web crushing in EN 1992	23/24	50
Websites	Eurocodes – an opportunity to review your spreadsheets?	13	24
	New e-learning programme about using wood [Wood For Good programme]	17	24
Welding	Dundrum town centre redevelopment [Northern Ireland Branch Supplement]	16	37
Whitemud Creek Arch Bridge, Edmonton, Canada	IStructE Structural Awards 2006: winners and commendations	21	5[Suppl]
Wind Tunnels	Burj Dubai raises the tall building stakes	23/24	13

Winds	Analysis of static wind effects on the membrane canopy roof of a large stadium	22	28
	Living the high life: the structural challenge	8	22
<b>Y</b>			
Young People	2005 Kenneth Severn Award: how to attract young people into engineering	10	13
	Making it happen: strengthening the appeal of engineering to young people [Kenneth Severn Award]	10	12
