

# Spotlight on Structures

Research Journal of The Institution of Structural Engineers

In this section we shine a spotlight on papers recently published in *Structures* – the Research Journal of The Institution of Structural Engineers.

*Structures* is a collaboration between the Institution and Elsevier, publishing internationally-leading research across the full breadth of structural engineering which will benefit from wide readership by academics and practitioners.

Access to *Structures* is free to Institution members (excluding Student members) as one of their membership benefits, with access provided via the 'My account' section of the Institution website. The journal is available online at: [www.structuresjournal.org](http://www.structuresjournal.org)

## Articles in press

The following articles have recently been made available online:

Article title	Authors	Available at:
<b>Tailored Buckling Constrained by Adjacent Members</b>	Lawrence Virgin	<a href="https://doi.org/10.1016/j.istruc.2018.08.005">https://doi.org/10.1016/j.istruc.2018.08.005</a>
<b>Vibration-based Structural Damage Detection Using Twin Gaussian Process (TGP)</b>	Saeid Taleai, Ali Beitollahi, Saeid Moshirabadi and Milad Fallahian	<a href="https://doi.org/10.1016/j.istruc.2018.08.006">https://doi.org/10.1016/j.istruc.2018.08.006</a>
<b>Novel digitally-manufactured wooden beams for vibration reduction</b>	C. Málaga-Chuquitaype and J. Ilkanaev	<a href="https://doi.org/10.1016/j.istruc.2018.08.003">https://doi.org/10.1016/j.istruc.2018.08.003</a>
<b>Estimate of Peak Relative Velocity from Conventional Spectral Velocity for Response Spectrum Based Force Evaluation in Damping Devices</b>	Ravindra Desai and Shrirang Tande	<a href="https://doi.org/10.1016/j.istruc.2018.07.014">https://doi.org/10.1016/j.istruc.2018.07.014</a>
<b>Probabilistic Safety Analysis of Prestressed Concrete Beams Failing Due to Web-crushing</b>	Oladimeji Benedict Olalusi and John T. Kolawole	<a href="https://doi.org/10.1016/j.istruc.2018.08.004">https://doi.org/10.1016/j.istruc.2018.08.004</a>
<b>Experimental and Numerical Investigation of the Buckling Performance of Tubular Glass Columns under Compression</b>	Mohd Khairul Kamarudin, Mustafasanie M. Yusoff, Peter Disney and Gerard A.R. Parke	<a href="https://doi.org/10.1016/j.istruc.2018.08.002">https://doi.org/10.1016/j.istruc.2018.08.002</a>
<b>An Insight into Structural Design against Deflection</b>	Tianjian Ji and Lee S. Cunningham	<a href="https://doi.org/10.1016/j.istruc.2018.08.001">https://doi.org/10.1016/j.istruc.2018.08.001</a>
<b>Validation of Temperature Simulations in a Portal Frame Bridge</b>	Erik Gottsäter, Oskar Larsson Ivanov, Miklós Molnár and Mario Plos	<a href="https://doi.org/10.1016/j.istruc.2018.07.007">https://doi.org/10.1016/j.istruc.2018.07.007</a>
<b>A GIS System Integrated with Earthquake Vulnerability Assessment of RC Building</b>	M.C. Ningthoujam and Radhikesh P. Nanda	<a href="https://doi.org/10.1016/j.istruc.2018.07.013">https://doi.org/10.1016/j.istruc.2018.07.013</a>
<b>Performance of Fiber-reinforced Self-consolidating Concrete for Repair of Bridge Substructures</b>	Mahdi Arezoumandi, Corey Wirkman and Jeffery S. Volz	<a href="https://doi.org/10.1016/j.istruc.2018.07.015">https://doi.org/10.1016/j.istruc.2018.07.015</a>
<b>Static deflection and thermal stress analysis of non-uniformly heated tapered composite laminate plates with ply drop-off</b>	Shushanth Ashok and Pitchaimani Jeyaraj	<a href="https://doi.org/10.1016/j.istruc.2018.07.010">https://doi.org/10.1016/j.istruc.2018.07.010</a>
<b>Predicted Versus Experimental Out-of-plane Force-displacement Behaviour of Unreinforced Masonry Walls</b>	Kevin Walsh, Dmytro Dizhur, Ivan Giongo, Hossein Derakhshan and Jason Ingham	<a href="https://doi.org/10.1016/j.istruc.2018.07.012">https://doi.org/10.1016/j.istruc.2018.07.012</a>
<b>The performance of lap splices in RC beams under inelastic reversed cyclic loading</b>	M.A. Najafgholipour, S.M. Dehghan, M. Khani and A. Heidari	<a href="https://doi.org/10.1016/j.istruc.2018.07.011">https://doi.org/10.1016/j.istruc.2018.07.011</a>
<b>A Low-cost Housing Solution: Earth Block Catenary Vaults</b>	Mitchell Gohnert, Ivanka Bulovic and Ryan Bradley	<a href="https://doi.org/10.1016/j.istruc.2018.07.008">https://doi.org/10.1016/j.istruc.2018.07.008</a>
